

Huron-Superior Catholic

DISTRICT SCHOOL BOARD

APPENDIX B

NOTICE OF LEAD EXCEEDANCE – FLUSHED SAMPLE

This message is for all parents and guardians at **Insert School Name and Location Here** (e.g., St. John Catholic Elementary School in Sault Ste. Marie).

Flushed Sample

An exceedance for lead under Ontario Regulation 243/07 (Schools, Private Schools and Child Care Centres) has been determined on a “flushed” sample. As required, notification has been made to the appropriate authorities. Corrective actions have been implemented. That is, the consumption point has been removed from service and regular / enhanced flushing has begun. A resampling of the consumption point will be done as soon as possible. Corrective actions will remain in place until the issue is resolved and a Notice of Resolution is issued.

More information on flushing and sampling for lead may be found at <https://www.ontario.ca/page/flushing-and-sampling-lead>.
