Huron-Superior Catholic
DISTRICT SCHOOL BOARD

our mission

Rooted in Jesus Christ, we are a Catholic learning community called and committed to develop the full potential of each child and to nurture a personal relationship with Jesus that will inspire Catholic leadership.

our vision

Dedicated to excellence in education and the desire to live the values of Jesus we strive to:

- affirm the sacredness of life and respect for all creation
- reverence the dignity of each person as a Child of God
- provide an enduring education that reflects the essence of our Catholic traditions
- proclaim Christ's message throughout the curriculum
- celebrate God's love in prayer, at Eucharist and in all sacramental moments of life
- create sacred learning environments
- cultivate enriching opportunities that will deepen faith.

our values

Guided by the Spirit on our journey, together with family and Church, we mutually invite, encourage and support one another in our efforts to transform the world.

www.hscdsb.on.ca

Director of Education's Message

Dear Students and Families,

As we prepare for another school year at St. Mary's College, we are reminded of the hope and potential that lies ahead. This year's theme for Catholic Education, *Pilgrims of Hope: On the Path to Holiness*, invites us all to walk together on a journey of faith, growth, and discovery. Every step you take in your educational journey is a step toward a bright future, one that is shaped by your unique gifts, passions, and aspirations.

At St. Mary's College, we are committed to supporting each student's success and well-being, as outlined in the school board's Multi-Year Strategic Plan. Our focus is on providing the guidance and opportunities you need to realize your full potential. As you choose courses that reflect your interests, consider future career pathways, and explore new areas of learning, our goal is to support you in discovering your own path to holiness, one rooted in faith and shaped by the Ontario Catholic School Graduate Expectations, which guide and prepare you for the journey ahead.

The school's motto, "Teach me Goodness, Discipline, and Knowledge", reflects the commitment of the dedicated staff to guide and support you at every stage of your journey. With a caring and experienced team of educators and support staff, St. Mary's College provides a welcoming environment where you can explore your passions, develop new skills, and achieve your goals.

As you prepare to make your course selections, I encourage you to embrace the opportunities before you and to trust in the journey. There will be challenges, yes, but also countless memorable experiences that will shape your high school years and beyond. These moments of growth and discovery will serve as the foundation for your future successes.

Pope Francis once said, "Hope is a virtue that inspires our actions and leads us to build a better world. It is born of faith and keeps our hearts open to the future." Let this quote serve as a reminder that your journey at St. Mary's College is not just about the choices you make today but about building a future filled with hope, purpose, and faith.

We look forward to walking this journey with you and supporting you as you make the decisions that will guide you toward your future success.

God bless,

Fil Lettieri

Students starting Grade 9 in September 2024 What Do You Need To Graduate From High School?

17 Compulsory Credits:	
4 English (1 credit per grade) *	1 credit from STEM (Science, Technology, Engineering and Math) - Related Course Group: <ul style="list-style-type: none"> • Business Studies • Computer Studies • Cooperative Education • Mathematics (in addition to the 3 compulsory required) • Science (in addition to the 2 compulsory required) • Technological Education (in addition to the 1 compulsory credit required)
3 Mathematics (1 credit in Grade 11 or Grade 12)	
2 Science	
1 Canadian History (Grade 10)	
1 Canadian Geography (Grade 9)	
1 Arts **	
1 Health & Physical Education	
1 French as a Second Language	
1 Technological Education (1 credit in Gr. 9 or 10)	
0.5 Career Studies	
0.5 Civics	

Students must also complete:	
+ 13 Optional Credits ***	<p>*The Grade 11 English: Understanding Contemporary First Nations, Métis and Inuit Voices course may be used to meet the Grade 11 compulsory credit requirement. English As A Second Language (ESL) and English Literacy Development (ELD) Students who are English learners may count up to three credits in ESL or ELD towards the four compulsory credits in English. The fourth credit must be a Grade 12 English course.</p> <p>** The Grade 9 Expressions of First Nations, Métis, and Inuit Cultures course may be used to meet the compulsory credit requirement.</p> <p>*** The 13 optional credits may include up to 4 credits earned through approved dual credit courses.</p>
+ Provincial Literacy Requirement	
+ 40 Hours of Community Involvement	
+ Provincial Financial Literacy Requirement	
+ 2 Online Learning Credits (with an option to opt out)	

Students starting Grade 9 before September 2024 What Do You Need To Graduate From High School?

18 Compulsory Credits

Students must earn the following compulsory credits to obtain the Ontario Secondary School Diploma:

- 4 credits in English (1 credit per grade) *
- 3 credits in mathematics (1 credit in Grade 11 or 12)
- 2 credits in science
- 1 credit in Canadian history
- 1 credit in Canadian geography
- 1 credit in the arts
- 1 credit in health and physical education
- 1 credit in French as a second language
- 0.5 credit in career studies
- 0.5 credit in civics

In addition, students must complete:

- ✓ 12 optional credits ^^
- ✓ 40 hours of community involvement activities
- ✓ the provincial literacy requirement
- ✓ 2 online learning credits (with an option to opt out)
- ✓ 1 credit in technological education (from Grade 9 or 10 courses)

Plus one credit from each of the following groups:

Group 1

- English or French as a second language
- a Native language
- a classical or international language
- social sciences and the humanities
- Canadian and world studies
- guidance and career education
- cooperative education

Group 2

- health and physical education
- the arts
- business studies
- French as a second language **
- cooperative education ***

Group 3

- science (Grade 11 or 12)
- technological education
- French as a second language **
- computer studies
- cooperative education ***

* A maximum of 3 credits in English as a second language (ESL) or English literacy development (ELD) may be counted towards the 4 compulsory credits in English, but the fourth must be a credit earned for a Grade 12 compulsory English course.

** In group 1, 2 and 3, a maximum of 2 credits in French as a second language can count as compulsory credits, one from group 1 and one from either group 2 or 3.

*** A maximum of 2 credits in cooperative education can count as compulsory credits.

^^ The 12 optional credits may include up to 4 credits earned through approved dual credit courses.

Community Involvement

One of the Ministry of Education requirements for the Ontario Secondary School Diploma is completion of **40 hours** of Community Involvement/Christian Service. The Huron-Superior Catholic District School Board has guidelines and procedures which guide students in their choice of activities. Each student will receive from their Religion Teacher or School Principal the guidelines which outline this requirement.

Ontario Secondary School Literacy Test

In order to earn the Ontario Secondary School Diploma, students must also successfully complete the Ontario Secondary School Literacy Test, administered in Grade 10, or will have the opportunity to re-take the test in subsequent years or will have the opportunity to meet this diploma requirement by enrolling and earning credit in the Ontario Secondary School Literacy Course (OLC40). **Successful completion of the Ontario Secondary School Literacy Test (OSSLT) or the Ontario Secondary School Literacy Course (OLC40) is required to achieve an Ontario Secondary School Diploma.**

Online Learning Requirement

Beginning with students who entered Grade 9 in the 2020-21 school year, all students must earn at least two online learning credits as part of the requirements for an Ontario Secondary School Diploma (OSSD), unless they have opted out (form signed by their parent), or been exempted. This online learning requirement also applies to adult learners entering the Ontario secondary school system starting in 2023-24 school year, unless they have opted out.

Note: It is the policy of the Huron-Superior Catholic District School Board that *all* students complete four (4) high school Religious Education courses.

THE CREDIT SYSTEM

Definition of a Credit

A credit is a means of recognition of the successful completion of a course for which a minimum of 110 hours has been scheduled. A credit is granted to a student by the principal of a secondary school on behalf of the Minister with a minimum of 50%.

Compulsory Credit

This is a specific course students must take that fulfills part of the Ontario Secondary School Diploma (OSSD) requirements. As part of the program in the Huron-Superior Catholic District School Board, students are required to take a Religious Education course each year.

Prerequisite Credit

This is a specific course one must successfully complete before taking another course at the same or next grade level.

Optional Credit

In addition to the 17 (18 for students in grade 9 before September 2024) compulsory credits students must take 9 (8 for students in grade 9 before September 2024) optional credits and 4 Religion credits for **a total of 30 credits**. Students may earn these credits by successfully completing courses that they have selected from the courses listed as available in the school course calendar. The school year is divided into two semesters: September to January and February to June.

Course Code

This 5 (or 6) character code describes the subject, grade, level or destination of a high school course.

Course Coding System

The course code consists of a course title and a sixth character code. The first five characters are designated by the Ministry of Education and Training. The Huron-Superior Catholic District School Board determines the sixth character.

Code Characters	Explanation	Example – SNC1W
1 st , 2 nd , and 3 rd	Subject discipline of the course in letters.	“SNC” Science
4 th	Grade level as a number “1” Grade 9 “3” Grade 11 “2” Grade 10 “4” Grade 12	“1” Grade 9
5 th	Type of course as a letter “D” Academic “P” Applied “W” De-streamed “C” College “U” University “M” College/University “E” Workplace “O” Open “L” Locally Developed	“W” De-streamed Course
6 th	Board designated character that may be used to differentiate between courses with similar codes.	“A” Advanced Placement “F” French Immersion

THE ORGANIZATION OF SECONDARY SCHOOL COURSES

GRADE 9 AND 10

Academic Courses (D) (Grade 10 Only)

Academic courses focus on the essential concepts of the discipline and also explore the related concepts. Academic courses develop students' knowledge and skills by emphasizing theoretical, abstract applications of the essential concepts and incorporating practical applications as appropriate.

Applied Courses (P) (Grade 10 Only)

Applied courses focus on the essential concepts of the discipline, but develop students' knowledge and skills by emphasizing practical, concrete applications of these concepts and incorporating theoretical applications as appropriate. Academic and applied courses differ in the balance between essential concepts, additional material, theory, and application.

De-streamed Courses (W) (Grade 9 Only)

De-streamed courses replace and blend the former academic and applied streamed courses at the Grade 9 level.

Open Courses (O) (Grade 9 and 10)

Open courses have one set of expectations for the discipline, appropriate for all students at any given grade. These courses are designed to prepare students for further study in certain subjects and enrich their education.

Locally Developed Courses (L) (Grade 9 and 10)

Locally Developed Courses are courses that meet educational and/or career preparation needs not met by provincial curriculum policy documents. Boards may develop courses locally that can be counted as optional credits in Grade 9 to 12 in any discipline. Boards may develop locally and offer one Grade 9 course in English, in mathematics, in science, and in French as a second language, and one Grade 10 course in English, in mathematics, in science, and in Canadian history that can be counted as a compulsory credit in that discipline. A student may count no more than seven such locally developed courses as compulsory credits. Students who successfully complete eight locally developed compulsory credit courses may count the eighth course as an optional credit. All locally developed courses require the approval of the Ministry.

GRADE 11 AND 12

University Preparation Courses (U)

University preparation courses are designed to equip students with the knowledge and skills they need to meet the entrance requirements for university programs. All university preparation courses are based on rigorous provincial curriculum expectations and will emphasize the development of both independent research skills and independent learning skills.

College/University Preparation Courses (M)

College/University preparation courses include content that is relevant for both university and college programs. These courses are designed to equip students with the knowledge and skills needed to meet the entrance requirements for specific university and college programs. All College/University preparation courses are based on rigorous provincial curriculum expectations and will emphasize the development of both independent research skills and independent learning skills.

College Preparation Courses (C)

College preparation courses are designed to equip students with the knowledge and skills they need to meet the entrance requirements for college programs. All college courses are based on rigorous provincial curriculum expectations and will emphasize the development of both independent research skills and independent learning skills.

Open Courses (O)

Open courses in grades 11 and 12 allow students to broaden their knowledge and skills in a particular subject that may or may not be entirely related to their post-secondary goals, but that reflects their interest. These courses are appropriate for all students regardless of post-secondary destination.

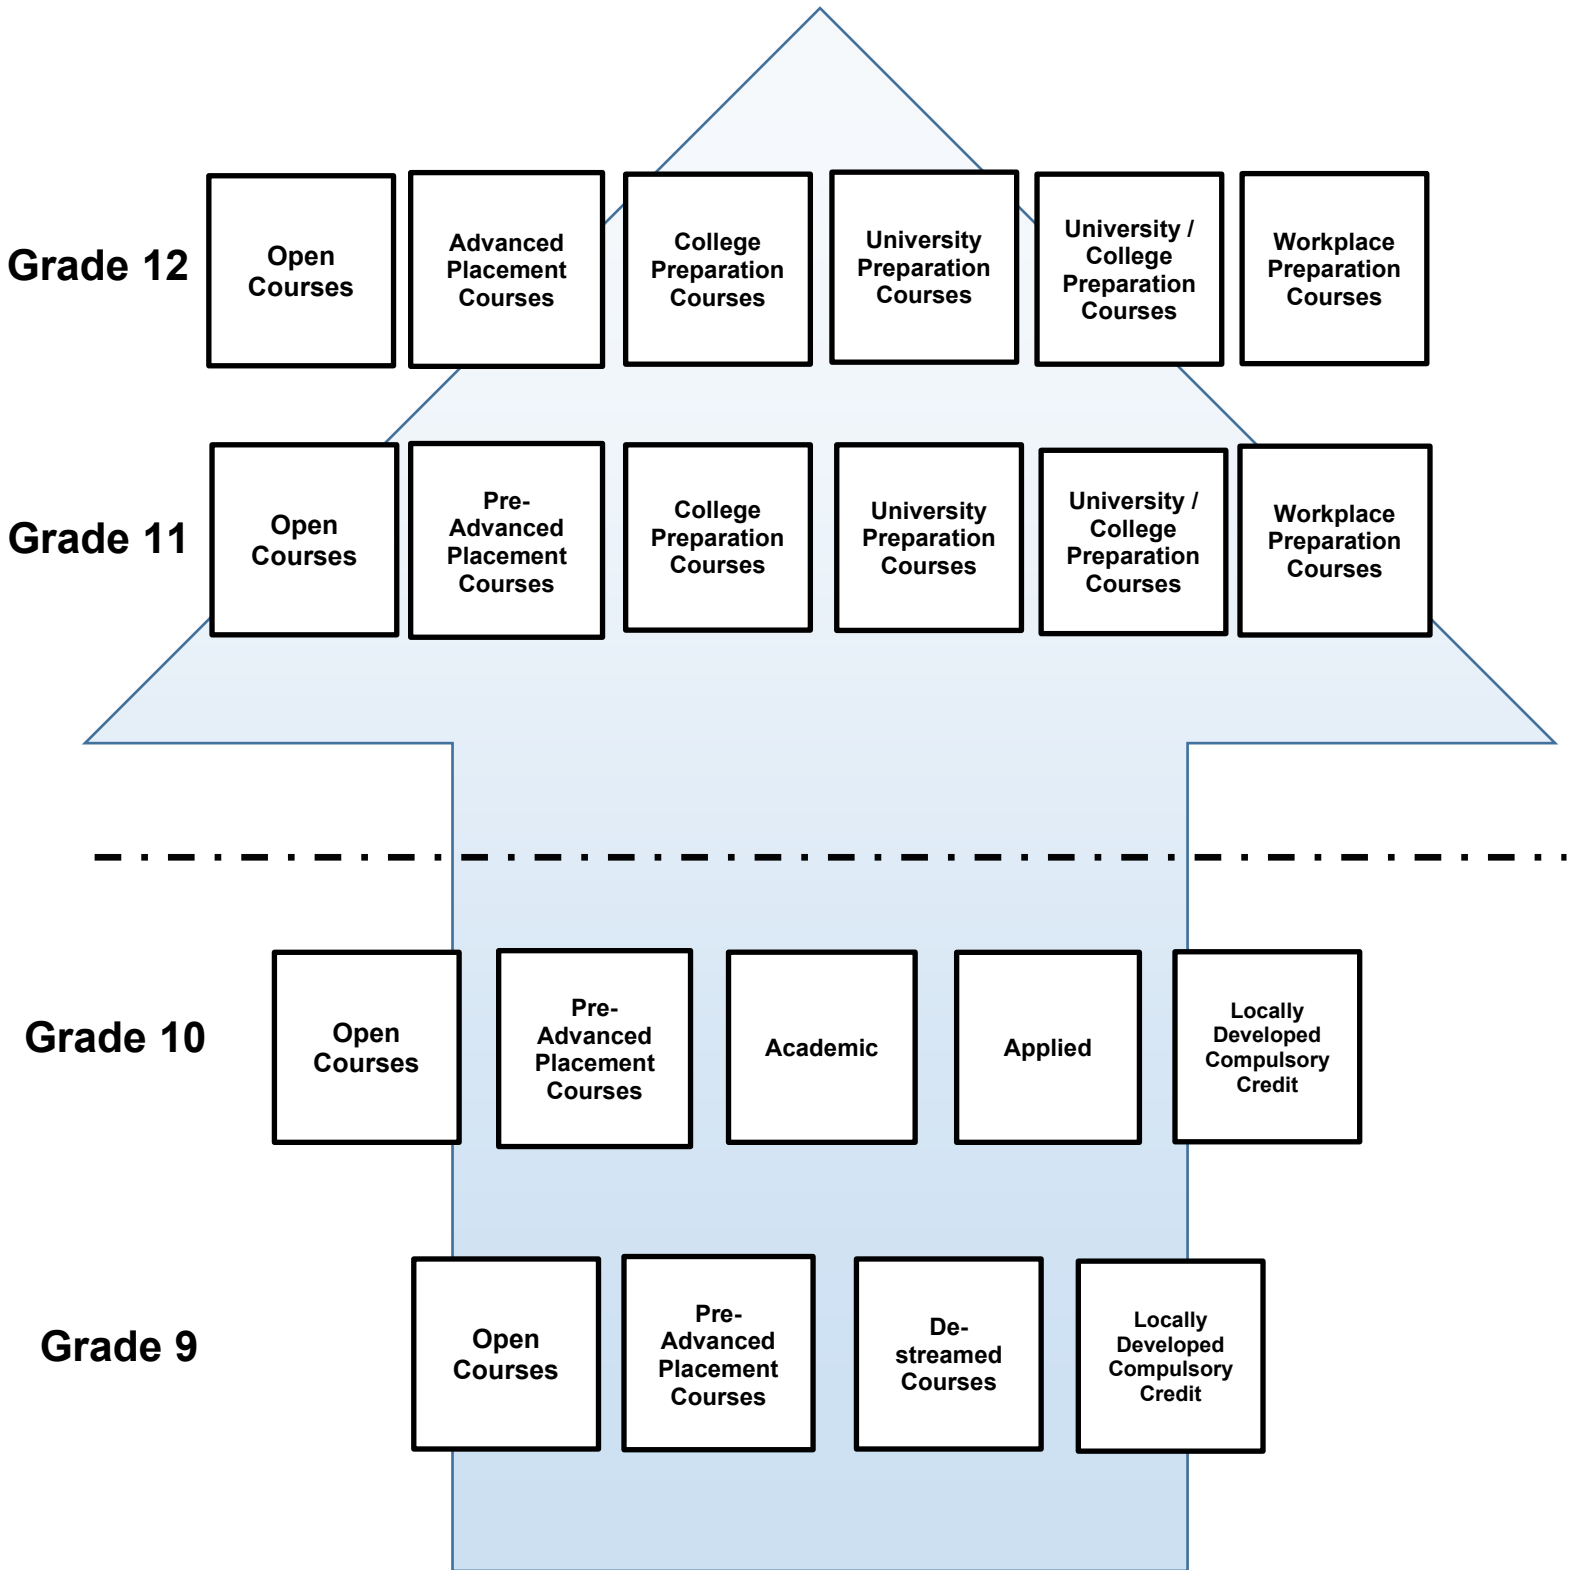

Workplace Preparation Courses (E)

Workplace preparation courses are designed to equip students with the knowledge and skills they need for direct entry into the workplace or for admission to apprenticeship programs and other training programs offered in the community. The range and content of the courses offered will allow students to prepare for a variety of jobs, training programs, and careers.

Credit Recovery

Credit Recovery may be available to students who have not achieved the credit. The subject teacher and the Credit Recovery school team will determine if the student is eligible to complete the failed course's missing expectations.

PATHWAYS THROUGH SECONDARY SCHOOL

GRANTING OF DIPLOMAS AND CERTIFICATES

On the recommendation of the principal, the Minister of Education and Training grants diplomas and certificates at any time during the year to students who have successfully completed the necessary requirements.

Where a student has completed the requirements through private study, evening classes, or summer school, the diploma or certificate will be issued by the principal of the school that possesses the student's Ontario Student Record when the final credit is earned. If the final credit is earned through the Independent Learning Centre, the student may choose to have the diploma or certificate issued by the Director of the Independent Learning Centre or the principal of the school last attended. The person issuing the diploma or certificate will submit the necessary report to the Ministry of Education and Training.

ONTARIO SECONDARY SCHOOL CERTIFICATE (OSSC)

The Ontario Secondary School Certificate (OSSC) will be granted, on request, to students who are leaving secondary school upon reaching the age of eighteen without having met the requirements for the Ontario Secondary School Diploma. To be granted an OSSC, a student must have earned a minimum of 14 credits, distributed as follows.

7 required compulsory credits

- ❖ 2 credits in English
- ❖ 1 credit in mathematics
- ❖ 1 credit in science
- ❖ 1 credit in Canadian history or Canadian geography
- ❖ 1 credit in health and physical education
- ❖ 1 credit in the arts, computer studies, or technological education

7 required optional credits

- ❖ 7 credits selected by the student from available courses

The provisions for making substitutions for compulsory credits also apply to the Ontario Secondary School Certificate.

CERTIFICATE OF ACCOMPLISHMENT

Students who are leaving secondary school upon reaching the age of eighteen without having met the requirements for the Ontario Secondary School Diploma or the Ontario Secondary School Certificate may be granted a Certificate of Accomplishment.

The Certificate of Accomplishment may be a useful means of recognizing achievement for students who plan to take certain kinds of further training, or who plan to find employment directly after leaving school. The Certificate of Accomplishment is to be accompanied by the student's Ontario Student Transcript. For students who have an Individual Education Plan (IEP), a copy of the IEP may be included.

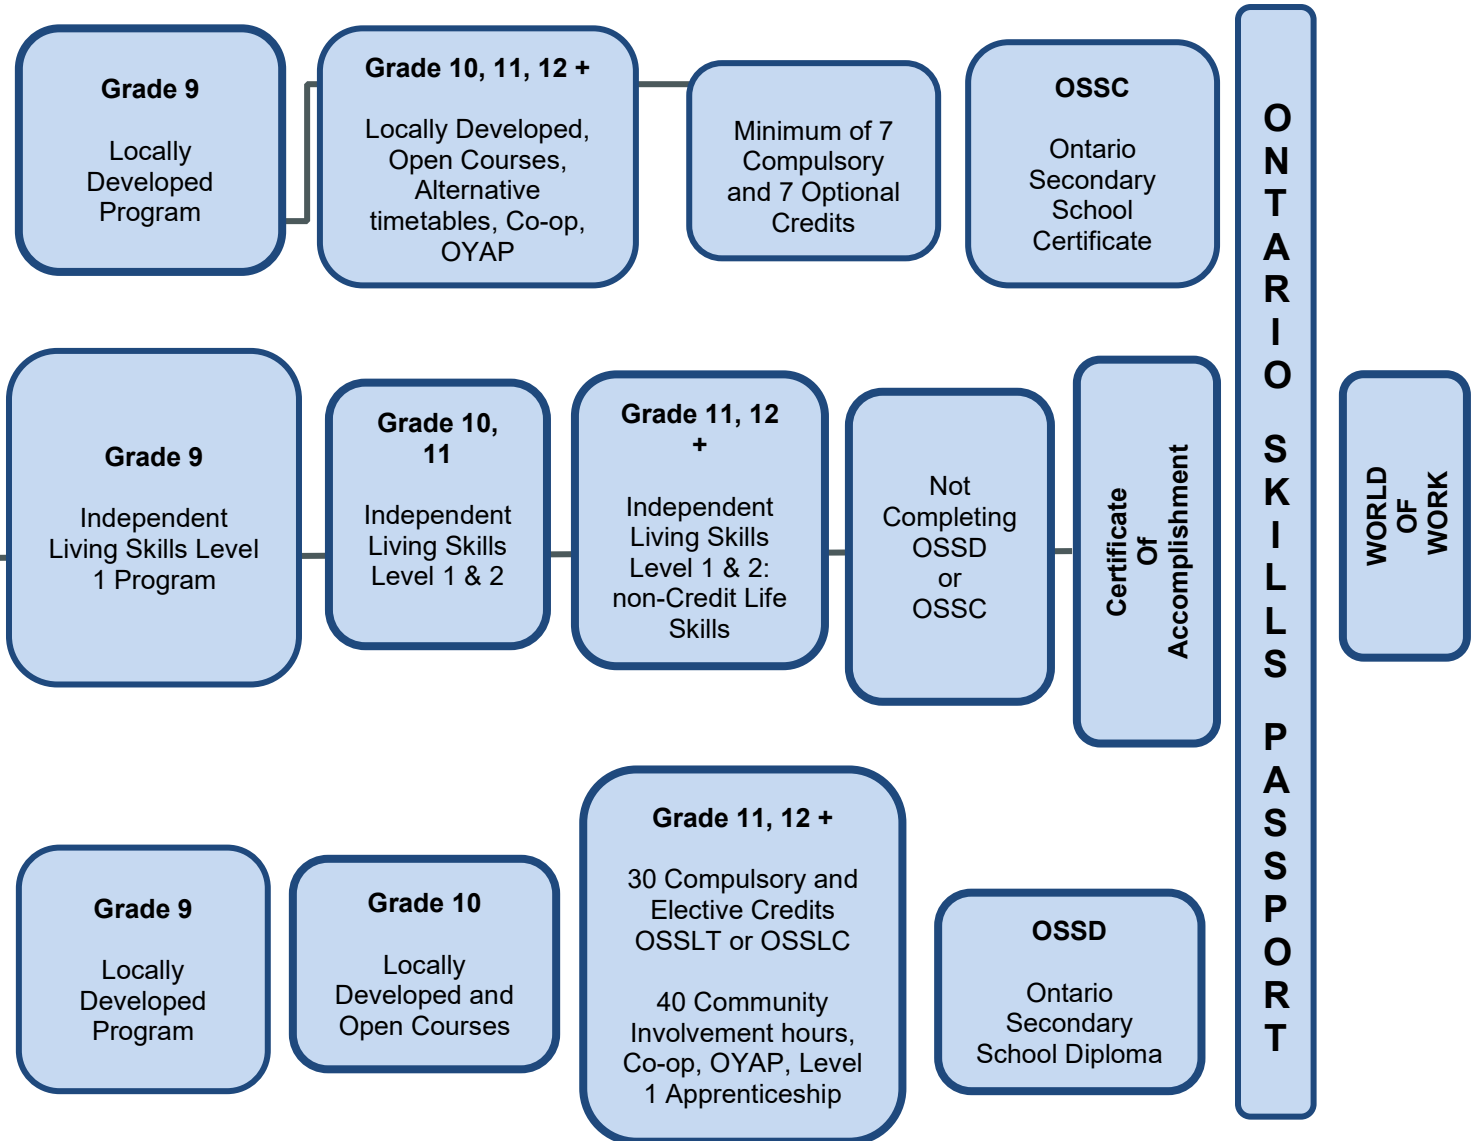

Students who return to school to complete additional credit and non-credit courses (including courses with modified or alternative expectations in special education programs) will have their transcript updated accordingly but will not be issued a new Certificate of Accomplishment. The Ontario Secondary School Diploma or Ontario Secondary School Certificate will be granted when the returning student has fulfilled the appropriate requirements.

SCHOOL-TO-WORK TRANSITIONS PROGRAM

The School-to-Work Transitions Program encourages and facilitates students intending to enter the workforce directly after graduating from secondary school. The program consists of a number of courses that prepare the students to meet the requirements of a specific job or career. These include opportunities for career exploration, job shadowing, skills development and co-operative education experiences directly related to their chosen career.

This program is available to all students with emphasis on exceptional students and students who receive Special Education services and programs. Partnerships have been established with employers to provide students with enhanced learning experiences and appropriate Co-operative Education placements where job opportunities are known to exist in the future.

SCHOOL-TO-WORK EDUCATION PATHWAYS

Students follow one of the three main pathways, but flexibility exists to move between pathways as well. Students in all pathways can access: Resource, work experience, Co-op (1/2 and full day), various Industry Certificates and Training.

THE SPECIAL EDUCATION PROGRAM

The fundamental aim of the secondary Special Education Program is to help students become independent learners while increasing their personal management skills, both in school and in other contexts. The Special Education/Learning Strategies Courses are based upon:

- assisting each student to become more aware of his/her strengths and weaknesses
- encouraging student participation in programming and remediation
- building self-awareness and self-esteem
- helping each student to develop responsibility for preparation for tests, for organizing and completing assignments
- adapting appropriate materials and using accommodations
- developing meaningful evaluation techniques in cooperation with the subject area teachers

There are different options available to exceptional/special needs students upon entering our secondary schools and throughout their academic career. During a student's last year of elementary school, the student, parents, Grade 8 Teacher, elementary and secondary Learning Resource Teachers, and Principal attend a "transition meeting" to discuss the courses and programs available in Grade 9. In this transition meeting, appropriate student courses are selected based on the student's needs. The Individual Education Plan is electronically transferred to the secondary school.

PROGRAMMING AVAILABLE FOR EXCEPTIONAL/SPECIAL NEEDS STUDENTS

Full Timetable with Learning Strategies Assistance

The student takes a full course load (4 credits per semester) with the option of seeking assistance in the Learning Strategies Classroom as it becomes necessary when determined by the student, parent(s), classroom teacher or Student Services Department. The student has the opportunity to write all tests and exams in the Learning Strategies Classroom.

Reduced Timetable

The student can enroll in three 1 credit courses, and one 1 credit Learning Strategies block per semester in Grades 9 & 10. In Grades 11 & 12, the student has the option of enrolling in a Learning Strategies block during one semester only.

Learning strategies courses have expectations and curriculum from the Ministry of Education. In addition, alternative programs are offered to special needs students working towards an Ontario Secondary School Certificate or an Ontario Secondary School Certificate of Accomplishment.

Substitutions for Compulsory Courses

In specific circumstances, when granted permission by the superintendent, substitutions may be made for a limited number of compulsory credit courses using courses from the remaining courses offered by the school that meet the requirements for compulsory credits. To meet individual student needs, principals may replace up to three of these courses.

In all cases, the sum of compulsory and optional credits will not be less than thirty for students aiming to earn the Ontario Secondary School Diploma and not less than fourteen for those aiming to earn the Ontario Secondary School Certificate. Substitutions should be made to promote and enhance student learning or to meet special needs and interests. Each substitution will be noted on the student's Ontario Student Transcript.

ENGLISH AS A SECOND LANGUAGE (ESL) AND ENGLISH LITERACY DEVELOPMENT (ELD) CURRICULUM

The Ontario ESL (English as a Second Language) and ELD (English Literacy Development) programs are designed to support multilingual learners in Grades 9-12 by fostering English language acquisition and literacy development while enabling them to achieve academic success across all subject areas. The ESL program focuses on helping students develop proficiency in **listening, speaking, reading, and writing** in English, tailored to various stages of language learning. Meanwhile, the ELD program supports students with limited prior formal education by developing foundational literacy skills and preparing them for participation in academic and community settings. Both programs emphasize the integration of language and content learning, cultural understanding, and the development of critical thinking skills, enabling students to transition effectively into mainstream courses and post-secondary opportunities.

NOTE: Students may substitute up to three ESL or ELD courses for compulsory English credit requirements. The fourth credit must be a Grade 12 compulsory English course (university, college, or workplace).

ONTARIO STUDENT RECORD (OSR)

The Ontario Student Record is the official record of a student's educational progress through schools in Ontario. The OSR contains achievement results, credits earned, diploma requirements completed, and other information important to the education of the student. Students and their parents (if the student is not an adult) may examine the contents of the OSR. These records are protected by the Education Act and Freedom of Information legislation.

ONTARIO STUDENT TRANSCRIPT (OST)

The Ontario Student Transcript (OST) provides a comprehensive record of a student's overall achievement in high school. The transcript will include the following information:

- The student's achievement in Grades 9 and 10, with percentage grades earned and credits gained for successfully completed credit courses.
- Full disclosure of all Grade 11 and 12 courses taken or attempted by the student, with the percentage grades earned and the credits gained.
- Identification of any course that has been substituted for one that is a diploma requirement.
- Confirmation that the student has completed the forty (40) hours of community involvement required.
- Successful completion of the Ontario Secondary School Literacy requirement.
- Successful completion of 2 online learning credits or a parental form signed by their parents indicating that they have opted out of this requirement.

The official transcript document is available by contacting the Student Services Office. This document is used when students:

- transfer from one school to another (secondary or post-secondary);
- apply to Lake Superior State University and other American Colleges and Universities;
- apply for scholarships or bursaries;
- apply for part-time or full-time employment.

Students apply online to Ontario Colleges and Universities, including Sault College and Algoma University. Student Services from secondary schools submit student and transcript information electronically to accompany the application.

FULL DISCLOSURE & WITHDRAWAL FROM COURSES

All attempts at senior courses which include successful credits, failed courses, withdrawals and upgrades are entered on the Ontario Student Transcript. This is considered full disclosure. Students are expected to carry a full course load of four courses each semester in grades 9, 10 and 11. Students can schedule a study period after having earned 24 credits. If a Grade 12 student withdraws from a course within 5 instructional days following the issue of the midterm report, the withdrawal will not be reported on the Ontario Student Transcript. If a student withdraws from a course after 5 instructional days following the issue of the midterm report, the withdrawal will be recorded in the Ontario Student Transcript with a "W" in the credit column.

A parent/guardian signature is required for any change of level of a course if the student is under the age of 18.

ALTERNATIVE EDUCATION

Timetables are personalized using an adult learning model. Students ages 16 and older, are welcomed on a continuous intake basis.

Students may obtain credits through a variety of delivery formats:

- Credit courses
- Independent Learning Centre courses (ILC)
- Correspondence courses
- PLAR (Prior Learning Assessment and Recognition) for mature students
- Maturity credits (for those students who started secondary school before September 1999 in Ontario)
- Dual credits through Sault College
- Level 1 Apprenticeships

Students who would like to complete credits to achieve their Ontario Secondary School Diploma (OSSD) are encouraged to contact the Holy Angels Learning Centre at 705-945-5685 from 8:30 a.m. to 3:30 p.m., Monday to Friday during the regular school year.

OBTAINING CREDITS OUTSIDE OF THE REGULAR SCHOOL DAY

Students may wish to consider alternative ways of earning required credits. The options available include:

1. Continuing Education: summer courses or evening courses.
2. Online courses.
3. Prior Learning Assessment and Recognition (PLAR) (see page 13).
4. **Music Certificates Accepted for Credits:**
 - A. A maximum of one Grade 11 university/college preparation music credit may be awarded towards the OSSD for the successful completion of one of the following:
 - Grade VII Practical and Intermediate Rudiments (formerly Grade 1 Rudiments) of the Royal Conservatory of Music Toronto
 - Grade VII Practical and Grade III Theory of Conservatory Canada, London, Ontario
 - Collegial I Practical and Collegial I Theory of any conservatory of music in the province of Quebec Grade V Practical and Grade III theory of Trinity College London, England
 - Grade VII Practical and Grade VI Theory of the Royal Schools of Music, London, England
 - B. A maximum of one Grade 12 university/college preparation music credit may be awarded toward the OSSD for the successful completion of one of the following:
 - Grade VIII Practical and Advanced rudiments (formerly Grade II rudiments of the Royal Conservatory of Music, Toronto.
 - Grade VIII Practical and Grade IV Theory of Conservatory Canada, London, Ontario
 - Collegial II practical and Collegial II Theory of any conservatory of music in the province of Quebec.
 - Grade VI Practical and Grade IV Theory of Trinity College London, England
 - Grade VIII Practical and Grade VIII Theory of the Royal Schools of Music, London, England

Notes:

- *The term **practical** refers to any musical instrument on which performance is examined. It includes voice (i.e. singing) but not speech arts.*
- *The mark credited to the student is calculated by averaging the marks that the student has earned in the practical component and the rudiments or theory as the case may be.*
- *Students are asked to submit official transcripts to Student Services.*

PRIOR LEARNING ASSESSMENT AND RECOGNITION (PLAR)

Challenge for Credit

Students may obtain credits towards the secondary school diploma (OSSD) for knowledge and skills that they have acquired outside of secondary school. This prior learning is assessed and evaluated to determine whether the student has met the Provincial Course Expectations. Students may “challenge” a specific course for credit if they can provide evidence indicating a likelihood of success.

A student who believes that she or he possesses the full range of knowledge and skills for a Grade 10, Grade 11 or Grade 12 course in the school course calendar can obtain further information from a Guidance Counsellor in Student Services. The student should be prepared to provide evidence for success in the challenge process (e.g., a portfolio, documentation of related course work). **Further, the student will be required to demonstrate achievement of the Ministry Course Expectations through formal tests and other assessment strategies appropriate for the particular course. Students who are successful in the challenge assessment will receive a final percentage grade and a credit for the course.**

Mature Students

Prior Learning Assessment and Recognition (PLAR) for Mature Students is the formal evaluation and credit-granting process through which mature students, who are enrolled in a secondary school course, may obtain credits for prior learning. Mature students may obtain credits towards the Ontario Secondary School Diploma (OSSD) for knowledge and skills that they have acquired, in both formal and informal ways, outside secondary school. The PLAR process involves: Grade 9 and 10 individual assessment/equivalency process; Grade 11 and 12 equivalency process; and Grade 11 and 12 challenge process.

In all cases, the knowledge and skills gained through education, work experience, and training must be directly related to the provincial curriculum expectations.

By using this process, mature students may be granted up to 26 credits towards their OSSD by the principal. For more information and details about how to apply, or to obtain a brochure on the PLAR Process for Mature Students and Facts Sheets on each PLAR process, contact Holy Angels Learning Centre at 705 945-5656.

EVALUATION AND EXAMINATION POLICIES

Effective assessment, evaluation, and reporting not only provide information about student achievement, but also afford a basis for improving both instructional programs and student achievement. A well-designed system of assessment, evaluation, and reporting based on clearly stated curriculum expectations and achievement criteria allows teachers to focus on high standards of achievement from all students and promotes consistency in these practices across Ontario.

Final Grades

The final grade for a course will reflect 70% for the evaluations conducted throughout the whole course and 30% for the final evaluation conducted near the end of the course.

Secondary School Provincial Report Card

All students in Ontario receive a standard report card based on the Ontario curriculum. The report card provides clear and detailed information to each student and to his/her parents about how well the student is achieving the provincial curriculum expectations. The student’s learning skills will also be assessed throughout the course, and will be reported separately on the provincial report card. Students will be issued a mid-term report (November and April) and a final report at the end of each semester. The final report card for the semester also provides a summary of credits achieved and graduation requirements completed.

Parent-Teacher-Student Conferences

Parent-Teacher-Student conferences are scheduled each semester. Parents and guardians are also encouraged to contact the school at any time regarding the achievement of their son/daughter.

EXPERIENTIAL LEARNING PROGRAMS

Experiential learning courses are planned learning experiences that take place in the community, providing the student with the opportunity to enhance their school programs while earning credits.

Whether bound for university, college, apprenticeship or the workplace, experiential learning programs can assist all students, including exceptional students, in making career decisions as well as in developing the knowledge, skills and attitudes that are essential in today's society.

The secondary schools of the Huron-Superior Catholic District School Board offer four experiential learning programs: Co-operative Education Program; Ontario Youth Apprenticeship Program (OYAP), and School to Work Transition Program, and the Outdoor Education Program.

For more information on the Experiential Learning Programs please contact Student Services in your school.

CO-OPERATIVE EDUCATION

What Is Co-operative Education?

Co-operative education is a program that allows students to earn secondary school credits while completing a work placement in the community.

A student's co-op program consists of the co-operative education course, (monitored by a co-operative education teacher), and the related curriculum course from any discipline. Every student in a co-op program must have a Personalized Placement Learning Plan (PPLP) which shows how the student's related curriculum course is being applied at the placement.

The co-operative education course consists of a classroom component and a placement. The classroom component includes 15 to 20 hours of pre-placement instruction which prepares students for the workplace. This includes instruction in health and safety. Classroom sessions held at various times during the semester provide opportunities for students to reflect on and reinforce their learning in the workplace.

Co-operative education allows students to participate in valuable learning experiences that help prepare them for the next stage of their lives, whether in apprenticeship training, college, community living, university, or the workplace.

How Does Co-operative Education Benefit Students? Co-operative education gives students the opportunity to:

- make connections between school and work and to explore a career of interest before finalizing plans for postsecondary education, training, or employment;
- develop the essential skills and work habits required in the workplace and acquire a direct understanding of employer and workplace expectations;
- gain valuable work experience to help build their resume for postsecondary programs and future employment.

How Does Co-operative Education Help Students Meet Diploma Requirements?

- Co-operative education credits may be used to meet up to two of the compulsory credit requirements for the Ontario Secondary School Diploma (OSSD).
- Students must also earn optional credits for the OSSD. There is no limit to the number of optional credits that may be earned through co-operative education courses.
- Under the Ministry-approved framework for the Specialist High Skills Major (SHSM) designation within the OSSD, students must earn a minimum of two co-operative education credits as one of the five required components of a SHSM. Co-operative education credits are also a required component of other specialized programs, such as school-to-work and apprenticeship (OYAP) programs.

ONTARIO YOUTH APPRENTICESHIP PROGRAM (OYAP)

What is OYAP?

The Ontario Youth Apprenticeship Program is a specialized, school to work program that enables students who are 16 years of age or older to meet diploma requirements while participating in an occupation that requires apprenticeship.

How does the Ontario Youth Apprenticeship Program benefit students?

By participating in OYAP, students:

- gain on-the-job training and experience in an apprenticeship in a skilled trade while earning credits towards the Ontario Secondary School Diploma (OSSD).
- accumulate workplace hours that count towards both secondary school co-op credits and the requirements of an apprenticeship program.
- may have an opportunity to receive Level 1 apprenticeship in-school training or be eligible to write an exemption test for Level 1.
- may earn optional credits towards their OSSD for Level 1 apprenticeship in-school training, if enrolled in a Ministry-approved dual credit program.

How do students participate in OYAP?

- To participate in OYAP, students must be at least sixteen years old and have accumulated a minimum of 16 credits towards their OSSD. An OYAP student earns cooperative education credits for work experience in an apprenticeship occupation.
- In some cases, employers may formally register students as apprentices with the Ministry of Labour, Immigration, Training and Skills Development (MLITSD).
- Students may have the opportunity to be enrolled in Level 1 apprenticeship in-school training, delivered by a community college or another MTCU-approved training facility, or may be eligible to write a Level 1 exemption test upon successful completion of a multiple-credit secondary school technological education course.
- A student may participate in OYAP as part of a Specialist High Skills Major (SHSM) program.

OYAP-FAST (Focused Apprenticeship Skills Training)

OYAP-FAST is an accelerated stream within OYAP that allows students to participate in more apprenticeship learning while working towards their OSSD. To be eligible for OYAP-FAST, students must:

- Meet the OYAP eligibility requirements;
- Have a signed parent consent form to participate in FAST.

Students participating in OYAP-FAST must:

- Earn 8 to 11 cooperative education credits with their placement component in the skilled trades;
- Register as an apprentice (obtain an RTA) by the time they complete the 8th cooperative education credit

Once a student has completed these requirements and all other OSSD requirements, they will be awarded the OYAP-FAST seal on their OSSD. Please see Student Services if you are interested.

Dual Credit Programs

The Dual Credit Program is a cooperative effort with a mandate to assist in creating a seamless transition for students from secondary school to college. The Algoma Regional Planning Team includes a representative from: Algoma District School Board; Huron-Superior Catholic District School Board; and Sault College of Applied Arts and Technology.

The Dual Credit Program also sponsors the following pathway activities:

ACTIVITIES, PROJECTS AND FORUMS

Specialist High Skills Major Pathways to College Programs

- Develop curriculum pathways for secondary courses to college programs which include the minimum academic admission requirements as well as suggested courses in related subject areas.

Teacher/Faculty Development Forum

- Forum is used to inform secondary teachers, secondary administrators, and college faculty about SCWI initiatives and projects.

DUAL CREDIT PROGRAMS (Grades 11 and 12)

- Career Exploration in a variety of program areas.
- Students book an appointment with the Guidance Counsellor responsible for Dual Credits to complete a registration form in PRISM. Students and parents (if the student is under 18) must complete a Dual Credit Program authorization and consent statement. The RPT determines successful candidates based on seats available and the quota for each participating board based on enrolment ratios.
- Students can count a maximum of 4 College delivered Dual Credits as optional credits toward OSSD.
- Dual credits cannot be used as substitutions for compulsory credit requirements.

Student/Parent Dual Credit Information Sessions

- Orientation session to inform students and parents about dual credit opportunities and expectations.

School College Connection Program

This program gives students who have stopped attending secondary school and are within 6 credits of graduating an opportunity to attain an OSSD in a college setting. Participants are selected from the list identified based on their potential to succeed in a college program. All classes for these students are scheduled at Sault College. Students complete missing secondary credits using Independent Learning Centre and E-Learning course materials under the direction of a secondary teacher. Students also enroll in approved dual credit college courses while completing their secondary diploma requirements.

Specialist High Skills Major Programs (SHSM)

Reach-ahead dual credit opportunities are available for students pursuing Specialist High Skills Major (SHSM) programs.

TWO FOR ONE! DUAL CREDITS COUNT AS SECONDARY AND COLLEGE CREDITS!

DUAL CREDIT OPPORTUNITIES AT SAULT COLLEGE 2026-2027

**Subject to funding approval, sufficient enrolment, scheduling changes and additions.
Please contact Student Services for up-to-date course offerings.**

**Costs for tuition, textbooks, and transportation are paid by the
Dual Credit Program.**

Summer Dual Credits – July/August 2027

Summer Dual Credit programming may be available – information to be released later.

SPECIALIST HIGH SKILLS MAJOR IN BUSINESS

Overview

The Specialist High Skills Major (SHSM) is a specialized, Ministry-approved program that allows grade 11 and 12 students to focus their learning on a specific economic sector while meeting the requirements of the Ontario Secondary School Diploma (OSSD). The SHSM program in Business provides students an opportunity to specialize, gain training, earn certifications, and plan for a career in the business sector before graduating and entering apprenticeship training, college, university or an entry-level position in the workplace.

The business sector, the central pillar of Canada's economy, is bursting with opportunities in entrepreneurship, finance, retail, real estate, human resources, marketing, management and budget-related careers. Because of globalization and new technology, the business sector also offers opportunities in the international market. As long as there is commerce, qualified and knowledgeable workers in business will find prospects either in one of Canada's prospering companies or as an entrepreneur in one of their own.

Required Components for the SHSM – Business

1.	Bundled Credits: 4 "major" credits in the Business listing (Gr. 11 and/or Gr. 12) 2 English credits (Gr. 11 and Gr. 12) 2 Math credits (Gr. 11 and Gr. 12) 2 Cooperative Education credits (Gr. 11 or Gr. 12)
2.	Experiential Learning and Career Exploration – Planned activities that take place outside of the regular classroom which relate to the SHSM sector such as field trips, guest speakers, conferences, and job shadowing.
3.	"Reach Ahead" Experiences – Opportunities that allow for students to relate to post-secondary pathways in apprenticeship, college, university, and the workplace
4.	Sector Partner Contextualized Components and/or Innovation, Creativity, Entrepreneurship (ICE) Training.
5.	Certification and Awareness Training – Earn sector recognized certifications and awareness training.

Occupations in the Business Sector by Postsecondary Destination

The following are examples of sector specific occupations accessible directly after Grade 12 graduation or after postsecondary education and training. Many are available in the Algoma Region.

University	College	Workplace	Apprenticeship Training
Business Development Officer Marketing Researcher & Consultant Economist Economic Policy Researcher & Analyst Executive Assistant Financial & Investment Analyst Financial Auditor & Accountant Mathematician, Statistician & Actuary Professional in Business Services Securities Agent, Investment Dealer & Broker Social Policy Researcher, Consultant & Program Officer Specialist in Human Resources	Accounting & Related Clerk Administrative Clerk Administrative Officer Assessor, Valuator & Appraiser Banking, Insurance & Other Financial Clerk Bookkeeper Conference & Event Planner Court Officer & Justice of the Peace Desktop Publishing Operator & Related Occupations Insurance Adjuster & Claims Examiner Legal Secretary Loan Officer Personnel 7 Recruitment Officer Personnel Clerk Professional in Business Services Purchasing Agent & Officer Retail & Wholesale Buyer Secretary (except Legal & Medical) Social Policy Researcher, Consultant & Program Officer	Accounting & Related Clerk Administrative Clerk Banking, Insurance & Other Financial Clerk Customer Service & Related Clerks Customer Service Representative – Financial Services Customs, Ship & Other Broker General Office Clerk Payroll Clerk Personnel Clerk Postal or Mail Clerk Purchasing & Inventory Clerk Real Estate Agent & Salesperson Receptionist, Admitting Clerk Records Management & Filing Clerk Retail & Wholesale Buyer Retail Salesperson & Sales Clerk Shippers & Receivers Storekeeper & Parts Clerk	Hardware, Lumber & Building Materials Retailer Parts Technician Special Events Coordinator

SPECIALIST HIGH SKILLS MAJOR IN CONSTRUCTION

Overview

A Specialist High Skills Major (SHSM) is a specialized, Ministry-approved program that allows grade 11 and 12 students to focus their learning on a specific economic sector while meeting the requirements of the Ontario Secondary School Diploma (OSSD). The SHSM program in Construction provides students an opportunity to specialize, gain

training, earn certifications, and plan for a career in the construction and skilled trades sector before graduating and entering apprenticeship training, college, university, or an entry-level position in the workplace.

The Ontario construction workforce will experience a gradual generational shift over the next decade, particularly in the skilled trades, due to the looming retirement of many workers. This will put pressure on the provincial construction industry to both develop and hire enough highly skilled workers. The Specialist High Skills Major in Construction allows students to progress through the construction process from the design and drawing stage to the actual construction process from the design and drawing stage to the actual construction of a variety of structures.

Required Components for the SHSM – Construction

1.	<p>Bundled Credits:</p> <ul style="list-style-type: none"> 4 “major” credits in the Construction listing (Gr. 11 and/or Gr. 12) 2 English credits (Gr. 11 and Gr. 12) 2 Math credits (Gr. 11 and Gr. 12) 1 Business or Science credit or 1 additional major credit (Gr. 11 or Gr. 12), or 1 additional coop credit (Gr. 11 or Gr. 12) 2 Cooperative Education credits (Gr. 11 or Gr. 12)
2.	Experiential Learning and Career Exploration – Planned activities that take place outside of the regular classroom which relate to the SHSM sector such as field trips, guest speakers, conferences, and job shadowing.
3.	“Reach Ahead” Experiences – Opportunities that allow for students to relate to post-secondary pathways in apprenticeship, college, university, and the workplace.
4.	Sector Partner Contextualized Components and/or Innovation, Creativity, Entrepreneurship (ICE) Training.
5.	Certification and Awareness Training – Earn sector recognized certifications and awareness training.

Occupations in the Construction Sector by Postsecondary Destination

The following are examples of sector specific occupations accessible directly after Grade 12 graduation or after postsecondary education and training.

University	College	Workplace	Apprenticeship Training
Architect	Construction Managers	Construction Trades	Carpenter
Mechanical Engineers	Contractors & Supervisors:	Helpers & Labourers	Electrician
Structural Engineer	Electrical Trades & Telecommunications	Carpenter Helper	Plumber
	Interior Designer	Construction Labourer	Heating & Air Conditioning Contractor
	Homebuilding Inspector	Demolition Worker	Brick & Stone Mason
	Home Builder	Drywall Sander	Painter & Decorator
	Construction Estimator	Home Renovator	Roofer
	Construction Superintendent		Construction Millwright
	Construction Technician		
	Construction Technologists		
	Architectural Design Technician/Technologist		

SPECIALIST HIGH SKILLS MAJOR IN HEALTH AND WELLNESS

Overview

A Specialist High Skills Major (SHSM) is a specialized, Ministry-approved program that allows grade 11 and 12 students to focus their learning on a specific economic sector while meeting the requirements of the Ontario Secondary School Diploma (OSSD). The SHSM program in Health and Wellness provides students an opportunity to specialize, gain

training, earn certifications, and plan for a career in the health and wellness sector before graduating and entering apprenticeship training, college, university, or an entry-level position in the workplace.

The demand for professionals in the health and wellness sector in Ontario and across Canada is on the rise as the age of our population increases leading to retirements in this field. This sector has a wide variety of career opportunities and is one of the largest employers in Canada. Over 2 million Canadians are currently employed in a health-related job according to Statistics Canada.

Required Components for the SHSM – Health and Wellness

1.	<p>Bundled Credits: 4 “major” credits in the Health and Wellness listing (Gr. 11 and/or Gr. 12) 2 English credits (Gr. 11 and Gr. 12) 1 Math credit (Gr. 11 or Gr. 12) 1 Science or Social Science/Humanities credit (Gr. 11 or Gr. 12), or 1 extra major credit or 1 additional coop credit (Grade 11 or Grade 12) 2 Cooperative Education credits (Gr. 11 or Gr. 12)</p>
2.	<p>Experiential Learning and Career Exploration – Planned activities that take place outside of the regular classroom which relate to the SHSM sector such as field trips, guest speakers, conferences, and job shadowing.</p>
3.	<p>“Reach Ahead” Experiences – Opportunities that allow for students to relate to post-secondary pathways in apprenticeship, college, university, and the workplace.</p>
4.	<p>Sector Partner Contextualized Components and/or Innovation, Creativity, Entrepreneurship (ICE) Training.</p>
5.	<p>Certification and Awareness Training – Earn sector recognized certifications and awareness training.</p>

Occupations in the Health and Wellness Sector by Postsecondary Destination

The following are examples of sector specific occupations accessible directly after Grade 12 graduation or after postsecondary education and training. Many are available in the Algoma Region.

University	College	Workplace	Apprenticeship Training
Audiologist or Speech-Language Pathologist	Ambulance Attendants & Other Paramedical Occupations	Blood Donor Clinic Assistant	Child & Youth Worker

Psychiatrist			
Registered Nurse			
Sports Therapist			

SPECIALIST HIGH SKILLS MAJOR IN HOSPITALITY AND TOURISM

Overview

A Specialist High Skills Major (SHSM) is a specialized, Ministry-approved program that allows grade 11 and 12 students to focus their learning on a specific economic sector while meeting the requirements of the Ontario Secondary School Diploma (OSSD). The SHSM program in Hospitality and Tourism provides students an opportunity to specialize, gain training, earn certifications, and plan for a career in the hospitality and tourism sector before graduating and entering apprenticeship training, college, university, or an entry-level position in the workplace.

The tourism industry in Canada is a dynamic and growing employment sector that includes opportunities in hospitality, accommodation, food and beverage services, recreation, and travel services. Employment prospects and career advancement in the hospitality and tourism sector have never been better locally and world-wide.

Required Components for the SHSM – Hospitality and Tourism

1.	<p>Bundled Credits: 4 “major” credits in the Hospitality and Tourism listing (Gr. 11 and/or Gr. 12) 2 English credits (Gr. 11 and Gr. 12) 1 Math credit (Gr. 11 or Gr. 12) 1 Business or Science credit or 1 additional major credit (Gr. 11 or Gr. 12), or 1 additional coop credit (Gr. 11 or Gr. 12) 2 Cooperative Education credits (Gr. 11 or Gr. 12)</p>
2.	<p>Experiential Learning and Career Exploration – Planned activities that take place outside of the regular classroom which relate to the SHSM sector such as field trips, guest speakers, conferences, and job shadowing.</p>
3.	<p>“Reach Ahead” Experiences – Opportunities that allow for students to relate to post-secondary pathways in apprenticeship, college, university, and the workplace.</p>
4.	<p>Sector Partner Contextualized Components and/or Innovation, Creativity, Entrepreneurship (ICE) Training.</p>
5.	<p>Certification and Awareness Training – Earn sector recognized certifications and awareness training.</p>

Occupations in the Hospitality and Tourism Sector by Postsecondary Destination

The following are examples of sector specific occupations accessible directly after Grade 12 graduation or after postsecondary education and training. Many are available in the Algoma Region.

		Bartender	
		Food & Beverage Salesperson	

SPECIALIST HIGH SKILLS MAJOR IN NON-PROFIT

Overview

The Specialist High Skills Major (SHSM) is a specialized, Ministry-approved program that allows grade 11 and 12 students to focus their learning on a specific economic sector while meeting the requirements of the Ontario Secondary School Diploma (OSSD). The SHSM program in Non-Profit enables students to build a foundation of sector-focused knowledge and skills before graduating and entering apprenticeship training, college, university or an entry-level position in the workplace. Depending on local circumstances, this SHSM may be designed to have a particular focus – for example, on community action or international development.

Whether in the fields of social services, health care, community housing, the environment, sports, recreation, arts or culture, there are career paths for people that share the sector's common vision: *to make a difference*. Over a million Canadians perform paid work for close to 69,000 non-profit organizations located all across the country.

Required Components for the SHSM – Non-Profit

1.	<p>Bundled Credits:</p> <ul style="list-style-type: none"> 4 “major” credits in the Non-Profit listing (Gr. 11 and/or Gr. 12) 2 English credits (Gr. 11 and Gr. 12) 1 Math credit (Gr. 11 or Gr. 12) 1 Business or Science credit or 1 additional major credit (Gr. 11 or Gr. 12), or 1 additional coop credit (Gr. 11 or Gr. 12) 2 Cooperative Education credits (Gr. 11 or Gr. 12)
2.	<p>Experiential Learning and Career Exploration – Planned activities that take place outside of the regular classroom which relate to the SHSM sector such as field trips, guest speakers, conferences, and job shadowing.</p>
3.	<p>“Reach Ahead” Experiences – Opportunities that allow for students to relate to post-secondary pathways in apprenticeship, college, university, and the workplace</p>
4.	<p>Sector Partner Contextualized Components and/or Innovation, Creativity, Entrepreneurship (ICE) Training.</p>
5.	<p>Certification and Awareness Training – Earn sector recognized certifications and awareness training.</p>

Occupations in the Non-Profit Sector by Postsecondary Destination

The following are examples of sector specific occupations accessible directly after Grade 12 graduation or after postsecondary education and training. Many are available in the Algoma Region.

University	College	Workplace	Apprenticeship Training
Accountant	Administrative Officer	Administrative Clerk	Child and Youth Worker
Communications Manager	Business Manager-Non-Profit Organization	Festival Organizer	Development Service Worker
Community Development Officer	Bookkeeper	Fitness Instructor	Educational Assistant
Public Affairs Officer	Fundraising Consultant	Personal Trainer	Special Events Coordinator
Social Policy Researcher	Marketing Administration	Office Manager – Non-Profit Organization	
Consultant & Program Officer	Rural Development Officer	Recreation Program Leader	
Social Services Planner/Researcher		Records Management & Filing Clerk	
Social Worker			

ADVANCED PLACEMENT PROGRAM, PRE-AP AND AP

Enhanced learning opportunities available at St. Mary's College

The Pre-AP and Advanced Placement courses prepare students to write Advanced Placement exams. By writing Advanced Placement exams, students may earn credit or be exempt from first-year university courses. Many Canadian universities (and all American colleges and universities) have policies which will grant entrance or transfer credits for strong achievement in the AP exams. Parents and students are encouraged to refer to the Canadian AP website for more information - www.ap.ca

Students of the Huron-Superior Catholic District School Board may choose the following Pre-AP and AP courses:

Grade 9

English	ENL1WA	(Pre-AP)
Principles of Math	MTH1WA	(Pre-AP)
Science	SNC1WA	(Pre-AP)

Grade 10

English, Academic	ENG2DA	(Pre-AP)
Principles of Math, Academic	MPM2DA	(Pre-AP)
Science, Academic	SNC2DA	(Pre-AP)

Grade 11

English, University	ENG3UA	(Pre-AP)
Math, Functions, University	MCR3UA	(Pre-AP)
Science, Biology, University	SBI3UA	(Pre-AP)

Grade 12

English, University	ENG4UA	(AP)
Math, Advanced Functions, University	MHF4UA	(Pre-AP)
Math, Calculus and Vectors, University	MCV4UA	(AP)
Interdisciplinary Course: Math, University	IDC4UA	(AP)
Science, Biology, University	SBI4UA	(AP)

NOTE: Please refer to the Course Descriptions Section for complete information on Pre-AP courses offered.

OUTDOOR EDUCATION PROGRAM – SCOPE

SCOPE is an outdoor experiential learning opportunity where students will attend classes at both St. Mary's College and St. Kateri Outdoor Learning Centre. This is a two-credit course that can be taken every year in grades 9, 10, 11 and 12. Each year, students will earn a Physical Education credit and either a Religion (Grade 9), or Cooperative Education credit (Grades 10-12 students). These courses can be used as qualifiers for the Specialist High

Skill Major certification in Health and Wellness, as well as Hospitality and Tourism.

Students learn, in an outdoor environment, how to navigate using GPS, compasses, and maps. In addition, they participate in a variety of outdoor physical activities: hiking, biking, cross country skiing, snowshoeing, ice fishing, as well as traditional sports such as lacrosse, hockey & soccer. Students will also learn outdoor survival skills, raise fish to stock lakes, and study many other related environmental topics like species identification and interpreting weather. Students in grades 11 and 12 will also be able to gain certifications in a variety of special skills like First Aid Training.

In addition to learning in an outside environment, we value the connections with the ever-growing list of community partners, including the Tarentorus Fish Culture Station, Harvest Algoma, Clean North, Ministry of Natural Resources, Sault Ste. Marie Police Services.

Students in the Grade 11 and 12 programs have the additional opportunity to complete a Dual Credit with Sault College, thus earning three credits in total during the semester including Outdoor Navigation and Outdoor Certifications (chainsaw, brush saw, clearing saw, ATV safety certification and Personal Watercraft License).

21ST CENTURY LEARNING – BLENDED LEARNING

We live in a world of acceleration that looks ahead to unimagined possibilities in an unknowable future. As a secondary school we need to do our best to prepare our students so they can maximize the opportunities of our fast changing world. At St. Mary's College we are committed to incorporating new approaches to learning that will equip our students for their futures and Blended Learning is one of our instructional approaches that supports our mission.

Blended Learning employs on-line tools within a face-to-face classroom environment to increase student engagement and student achievement. At St. Mary's College, Blended Learning utilizes the Ministry of Education's on-line Learning Management System (LMS) to support classroom instruction. A real bonus for parents with Blended Learning is the ability for parents to access the LMS to keep in touch with daily student work and view their son/daughter's progress.

Although personal laptops are beneficial for students, they are not a requirement for Blended Learning. The school has access to laptop carts for in-school student use.

WHAT IS THE LEARNING MANAGEMENT SYSTEM (LMS)?

The LMS is the Ministry of Education's Learning Management System. Custom web pages provide students with many resources. The LMS provides our educators with a way to create and deliver content, monitor student participation, and assess student performance.

BENEFITS OF THE LMS

Content

- All course content available on teacher webpage
- Interactive tutorials and online lessons for practice at any time / teacher created video lessons
- Online practice tests and quizzes to check understanding
- Complete homework solutions available online

Communications

- Class discussion board allows students to communicate with each other during class or in the evening
- Easy access for parents to stay up-to-date with classroom instruction
- The email system allows students to contact their teacher regularly
- Grades available online and always updated
- Online calendar displays important dates for assignments, tests and quizzes
- Daily news feed contains all work for students who are absent

FREQUENTLY ASKED QUESTIONS

How do students access the LMS?

Students will log on to the site – <https://hscdsb.elearningontario.ca>. To allow access, students will be given a username and password to log in.

E-LEARNING

E-learning is an opportunity to complete high school courses on-line with the assistance of a qualified teacher.

E-learning:

- allows students to learn in a more independent and flexible environment
- supports inquiry and project-based learning

Grade	Course	Department and Subject
11	BMI3Ce	Marketing: Goods, Services, Events
12	CHY4Ue	World History Since the 15 th Century
12	EWC4Ue	The Writer's Craft
12	HHS4Ue	Families in Canada
12	SCH4Ce	Chemistry

Students must confirm the withdrawal date from an e-learning course with their e-learning teacher due to full disclosure guidelines.

Students are encouraged to contact Student Services about other courses available through e-learning.

CHOOSING YOUR COURSES

1. **Gather Information**

- Students and parents are encouraged to read the Course Calendar including Course Descriptions carefully available on the Board website: www.hscdsb.on.ca
- Students may explore career information and educational pathways at: <https://login.xello.world/account/Canada:9a907558-067e-4039-8ac8-b0aa376b2be4>
- Within the XELLO website, students may access information and course descriptions in Course Planner

2. **Seek Advice**

- Students are asked to discuss course selections thoroughly with parents/guardians
- Teachers may provide additional information related to specific subject areas
- Students are encouraged to meet with a Guidance Counsellor

3. **Make Informed Choices**

- Students in grades 9-12 will complete Course Selections electronically using Course Planner
- Students will be advised of this process by Student Services staff
- Parents are encouraged to participate in the Course Selection process

Students must choose courses carefully as subsequent changes in a student's timetable may be restricted due to class availability.

Where enrolment is insufficient, a course may be withdrawn.

Co-operative Education

Placements provide students with challenging opportunities to apply and extend knowledge, and refine skills. Students will demonstrate achievement of placement expectations that reflect current workplace practices and standards. Through this career exploration, students are better prepared to make informed choices for future goals, as well as meet with resource people who will assist in determining the correct path to these goals.

Co-operative Education: School-to-Work Transition, Grade 10, Open

COP2X

Co-operative Education courses include a classroom component, comprising pre-placement and integration activities, and a placement component. Students earn co-operative education credits by integrating classroom theory with planned learning experiences in the community to achieve learning based on the curriculum expectations of the related course.

Prerequisite: None

Co-operative Education, Grade 11, Open

COP3X

Co-operative Education courses include a classroom component, comprising pre-placement and integration activities, and a placement component. Students earn co-operative education credits by integrating classroom theory with planned learning experiences in the community to achieve learning based on the curriculum expectations of the related course.

Prerequisite: None

Note: OYAP registration is available to students who are working in an apprenticeship occupation. Please see your Coop teacher for more information.

Co-operative Education, Grade 12, Open

COP4X

Co-operative Education courses include a classroom component, comprising pre-placement and integration activities, and a placement component. Students earn co-operative education credits by integrating classroom theory with planned learning experiences in the community to achieve learning based on the curriculum expectations of the related course.

Prerequisite: None

Note: OYAP registration is available to students who are working in an apprenticeship occupation. Please see your Coop teacher for more information.

Creating Opportunities through Co-op, Grade 11, Open

DCO30

This course consists of a community-connected experience and a cooperative education curriculum focused on developing skills, knowledge, and habits of mind that will support students in their learning at school and beyond, today and in the future, as well as in their education and career/life planning. Within the context of the community-connected experience, students will apply skills, knowledge, and habits of mind that will protect and promote their health, safety, and well-being and that will strengthen their inquiry, decision-making, and leadership skills. Students will create and implement a learning plan that meets their particular interests and needs, reflect on their learning, and make connections between their experience in the community and other aspects of their lives.

Prerequisite: None

Note: OYAP registration is available to students who are working in an apprenticeship occupation. Please see your Coop teacher for more information.

French Immersion

The courses offered in the St. Mary's College French Immersion Program will enhance knowledge of the French language and culture and fulfill all of the requirements of the Ministry of Education. The student must complete a minimum of 10 courses in French Immersion subjects, 4 of which must be français (French language and literature) courses. The student will then receive a "Bilingual Certificate - Completion of French Immersion Program" document from the Huron-Superior Catholic District School Board. In designing the program, courses were selected which enhance both oral and written communication in the French language. Students are encouraged to complete 12 credits for a more meaningful experience in French Language Immersion.

	Compulsory Courses	Elective Courses
Grade 9	Français Langue Secondaire - Immersion (French Immersion) - FIF1DF Enseignement religieux (Religious Education) - HRE1OF Explorer la géographie du Canada (Exploring Canadian Geography) - CGC1WF	
Grade 10	Français Langue Secondaire - Immersion (French Immersion) - FIF2DF Enseignement religieux: "Christ et Culture" (Religious Education: "Christ & Culture") - HRE2OF Histoire du Canada depuis la Première Guerre mondiale (Canadian History Since World War 1) - CHC2DF Civisme et citoyenneté (Civics and Citizenship) - CHV2OF Exploration de carrière (Career Studies) - GLC2OF	Hôtellerie et tourisme, et métiers spécialisés (Hospitality and Tourism) - TFJ2OF

Grade 12	Français Langue Secondaire - Immersion (French Immersion) – FIF4UF Enseignement religieux : "Enseignement moral et religion catholique" (Religious Education : "Church & Culture") – HRE4MF	Cultures de la francophonie mondiale (World Cultures) – HSC4MF

**Français Langue Secondaire - Immersion
(French Immersion), Grade 9, Academic**

FIF1DF

This course provides opportunities for students to speak and interact in French independently in a variety of real-life and personally relevant contexts. Students will develop their skills in listening, speaking, reading, and writing, as well their ability to communicate in French with confidence, by using language learning strategies introduced in the elementary French Immersion program. Students will enhance their knowledge of the French language through the study of French Canadian literature. They will also increase their understanding and appreciation of diverse French-speaking communities, and will develop skills necessary for lifelong language learning.

Prerequisite: Minimum of 3800 hours of French instruction, or equivalent

**Explorer la géographie du Canada
(Exploring Canadian Geography), Grade 9, De-streamed**

CGC1WF

This course builds on learning in Grades 7 and 8 in geography. Students will explore relationships within and between Canada's natural and human systems and how they interconnect with other parts of the world. Students will also examine environmental and economic issues, and their impact related to topics such as natural resources and industries, careers, land use and responsible development, and sustainability. In addition, students will understand the connections that diverse communities and individuals have with the physical environment and each other throughout Canada, including First Nations, Métis, and Inuit perspectives. Students will apply geographic thinking, use the geographic inquiry process, and use geospatial technologies throughout their investigations.

Note: Choose this course for Grade 9 French Immersion program, compulsory Geography credit

Prerequisite: None

**Enseignement religieux
(Religious Education), Grade 9, Open**

HRE1OF

The study of God's self-revelation in both the Old and the New Testaments is introduced to students as they enter the second phase of their life - the secondary school experience. The teachings of the Catholic Church are the basis of this course. There is opportunity to celebrate our faith throughout the year. The grade nine course is intended to lead the student to a deeper love of the Hebrew and Christian scriptures.

Prerequisite: None

Note: Choose this course for Grade 9 French Immersion program, compulsory Religion credit.

**Histoire du Canada depuis la Première Guerre mondiale
(Canadian History Since World War 1), Grade 10, Academic**

CHC2DF

This course explores the local, national, and global forces that have shaped Canada's national identity from World War I to the present. Students will investigate the challenges presented by economic, social, and technological changes and explore the contributions of individuals and groups to Canadian culture and society during this period. Students will use critical-thinking and communication skills to evaluate various interpretations of the issues and events of the period and to present their own points of view.

Prerequisite: None

Note: Choose this course as the compulsory Canadian History credit in Grade 10, French Immersion.

**Civisme et citoyenneté
(Civics and Citizenship), Grade 10, Open (.5 credit)**

CHV2OF

This course explores rights and responsibilities associated with being an active citizen in a democratic society. Students will explore issues of civic importance such as healthy schools, community planning, environmental responsibility, and the influence of social media, while developing their understanding of the role of civic engagement and of political processes in the local, national, and/or global community. Students will apply the concepts of political thinking and the political inquiry process to investigate, and express informed opinions about, a range of political issues and developments that are both of significance in today's world and of personal interest to them.

Corequisites: If you take this course, you must also take GLC20F (.5 credit).

**Français Langue Secondaire - Immersion
(French Immersion), Grade 10, Academic**

FIF2DF

This course provides students with extensive opportunities to communicate, interact, and think critically and creatively in French. Students will use a variety of language learning strategies in listening, speaking, reading, and writing, and will respond to and interact with print, oral, visual, and electronic texts. Students will develop their knowledge of the French language through the study of contemporary French literature and historically well-known French European literature. They will also increase their understanding and appreciation of diverse French-speaking communities, and will develop skills necessary for lifelong language learning.

Prerequisite: FIF1DF

**Exploration de carrière
(Career Studies), Grade 10, Open (.5 credit)**

GLC2OF

This course teaches students how to develop and achieve personal goals for future learning, work, and community involvement. Students will assess their interests, skills, and characteristics and investigate current economic and workplace trends, work opportunities, and ways to search for work. The course explores postsecondary learning and career options, prepares students for managing work and life transitions, and helps students focus on their goals through the development of a career plan.

Corequisites: If you take this course, you must also take CHV2OF (.5 credit)

Prerequisite: None

**Enseignement religieux: “Christ et Culture”
(Religious Education: “Christ & Culture”), Grade 10 Open**

HRE2OF

This course both invites and challenges the adolescent to personalize the principles that guide Catholics in understanding their role in shaping culture through our discipleship. The exploration of these principles starts with the Scriptural foundations to the questions of what it means to be human and how God has and continues to shape our humanity through culture. The principles are then developed through the Gospel themes that reveal how Jesus’ Kingdom of God is expressed in all our relationships to ourselves, to others, to our civil society, to our Church, and to our Global community.

Prerequisite: None

**Hôtellerie et tourisme, et métiers spécialisés
(Hospitality and Tourism), Grade 10 Open**

TFJ2OF

This course provides students with opportunities to explore different areas of hospitality and tourism, as reflected in the various sectors of the tourism industry, with an emphasis on food service. Students will study culinary techniques of food handling and preparation, health and safety standards, the use of tools and equipment, the origins of foods, and event planning, and will learn about tourism attractions across Ontario. Students will develop an awareness of related environmental and societal issues and will explore secondary and postsecondary pathways leading to careers in the tourism industry.

**Français Langue Secondaire - Immersion
(French Immersion), Grade 11, University**

FIF3UF

This course provides opportunities for students to consolidate the communication skills required to speak and interact with increasing confidence and accuracy in French in a variety of academic and social contexts. Students will use their skills in listening, speaking, reading, and writing and apply language learning strategies while exploring a variety of concrete and abstract topics. Students will increase their knowledge of the French language through the study of French literature from around the world. They will also deepen their understanding and appreciation of diverse French-speaking communities, and will develop skills necessary for lifelong language learning.

Prerequisite: FIF2DF

**Grandes religions et croyances traditionnelles: perspectives, enjeux et défis****HRT3MF****(World Religions and Belief Traditions: Perspectives, Issues, and Challenges), Grade 11, College/University**

This course will fulfill the expectations of the Church in its desire that students in Catholic schools develop an objective and respectful understanding of other religious traditions from the perspective of the Catholic church. To that end, student learning will include an understanding of the Church's teachings on world religious traditions and those principles which inform ecumenical and inter-religious dialogue, together with an historical overview of the Church's relationship with various religions, particularly Judaism and Islam. For all students, this course will help break down prejudice about other religions, and for some they may lead to a deeper understanding and more authentic adherence to the teaching of the Church concerning spiritual and moral truth. Other religious traditions are encountered through the unique perspective of the Catholic Church.

Prerequisite: HRE2OF**Leadership et entraide****IDC3OF****(Leadership and Peer Support), Grade 11, Open**

This course combines the expectations from Interdisciplinary Studies with three courses: Business Leadership and Management Fundamentals, BOH4M; Families in Canada, HHS4U; and Leadership and Peer Support, GPP30. Students will develop and consolidate the skills to solve problems and make decisions. Students will apply the processes of inquiry to use a range of resources and to investigate real-life situations and career opportunities.

Prerequisite: None

Note: This course trains senior students with the skills, knowledge, and attitudes to relate effectively to others as student leaders and peer tutors in the school. Students in this course will be the leaders of Equipe Franco-Fun; our French Immersion Leadership group. Students will develop communication and interpersonal relationship skills, learn teaching strategies and conflict resolution techniques that will assist them in their tutoring and personal life. Tutors will explore careers that involve teaching and interacting with other people. Tutors choose a Core French or French Immersion subject area of strength and tutor students in one classroom 2-3 times a week. On the other days, students will meet to complete course work in class, progress in their tutoring strategies and plan and coordinate events for Equipe Franco-Fun to lead in the school and beyond.

Activités personnelles en forme physique**PAF3OF****(Personal Fitness Activities), Grade 11, Open**

This course is designed specifically for students who recognize the need to improve their personal fitness level and the need to develop life-long personal fitness skills. The focus is on the individual needs such as weight control, nutrition counselling, strength training and endurance training. Fitness levels will be monitored regularly. Students will be introduced to basic anatomy, the relationship between healthy eating and performance, and continuing an active lifestyle. Students will also study the components of healthy relationships, reproductive health, mental health, and personal safety. Through daily fitness activities and training students will develop discipline, commitment and the opportunity to improve and maintain their health and fitness goals.

Prerequisite: None**Note:** Students in Core French may choose this course based on an interview with the teacher.**Introduction à la psychologie, à la sociologie et à l'anthropologie,****HSP3UF****(Introduction to Anthropology, Psychology, and Sociology), Grade 11, University**

This course provides students with opportunities to think critically about theories, questions, and issues related to anthropology, psychology, and sociology. Students will develop an understanding of the approaches and research methods used by social scientists. They will be given opportunities to explore theories from a variety of perspectives, to conduct social science research, and to become familiar with current thinking on a range of issues within the three disciplines.

Prerequisite: The Grade 10 *academic* course in English, or the Grade 10 *academic* history course (Canadian and world studies)

**Francais Langue Secondaire - Immersion
(French Immersion), Grade 12, University**

FIF4UF

This course provides students with extensive opportunities to communicate, interact, and think critically and creatively in French. Students will consolidate their listening, speaking, reading, and writing skills and apply language learning strategies while communicating about concrete and abstract topics, and will independently respond to and interact with a variety of oral and written texts. Students will study a selection of French literature from the Middle Ages to the present. They will also enrich their understanding and appreciation of diverse French-speaking communities, and will develop skills necessary for lifelong language learning.

Prerequisite: FIF3UF

**Enseignement religieux: “Enseignement moral et religion catholique”
(Religious Education: “Church & Culture”), Grade 12, College/University**

HRE4MF

This course has the aim of assisting students in understanding themselves as moral persons living the way of Christ through an examination of ethical theories, the revelation of sacred Scripture, and the experience and teaching of the Catholic Church. It engages students in critical reflection on significant contemporary moral and ethical issues in light of Scripture, Church teaching, and important thinkers. Social and ecological justice issues are explored along with a study of topics that focus on Christian mercy and forgiveness. The graces and challenges of relationships, marriage, and family life are explored from a Catholic perspective. Students are challenged to articulate and adopt the Christian stance in the political world.

Prerequisite: HRT3MF

**Cultures de la francophonie mondiale
(World Cultures), Grade 12, College/University**

HSC4MF

This course examines the nature of culture; how cultural identities are acquired, maintained, and transformed; and theories used to analyse cultures. Students will explore world cultures, with an emphasis on the analysis of religious and spiritual beliefs, art forms, and philosophy. They will study the contributions and influence of a range of cultural groups and will critically analyse issues facing ethnocultural groups within Canada and around the world. Students will develop and apply research skills and will design and implement a social action initiative relating to cultural diversity.

Prerequisite: Any university, college or university/college preparation course in social sciences and humanities, English, or Canadian and world studies

Native Languages and First Nations, Métis and Inuit Studies

The Indigenous population continues to grow at St. Mary's College. Therefore, we are offering a package of courses with a strong Indigenous focus. The students who complete 10 of these courses will graduate with a Certificate of Completion of Indigenous Studies from the Huron-Superior Catholic District School Board. After careful consideration, the package of courses include Anishinaabemowin, History, Careers and Civics, Art and English courses with a strong emphasis on the stories, history and language of the original inhabitants of Turtle Island, known as North America.

These courses are open to **all** students as we believe it is important for all Canadians to have knowledge of Indigenous history and culture. The Certificate of Completion will be awarded to all students who complete 10 credits in this package. **Courses will run only if sufficient numbers warrant.**

Indigenous Counsellors

An Indigenous Graduation coach, Counsellors from Batchewana First Nation and Garden River First Nations, as well as counsellors from the Indigenous Friendship Centre and Métis Nation of Ontario, are available to speak with our students.

Native Languages, Level 1, Open**LNOAO**

This course is open to the entire student body and will allow students who have no prior Native language experience to develop an appreciation for a Native language and culture, to explore and experience a unique world view, and learn to speak a Native language. Students will use the language being studied for greetings and daily routines, become familiar with its writing and sound system, and practice basic vocabulary and phrases. Students will also use information technology during course-related activities.

Prerequisite: None

Expressions of First Nations, Métis, and Inuit Cultures, Grade 9, Open**NAC10**

This course explores various arts disciplines (dance, drama, installation and performance art, media arts, music, storytelling, utilitarian or functional art, visual arts), giving students the opportunity to create, present, and analyse art works, including integrated art works/ productions, that explore or reflect First Nations, Métis, and Inuit perspectives and cultures. Students will examine the interconnected relationships between art forms and individual and cultural identities, histories, values, protocols, and ways of knowing and being. They will demonstrate innovation as they learn and apply art-related concepts, methods, and conventions, and acquire skills that are transferable beyond the classroom. Students will use the creative process and responsible practices to explore solutions to creative arts challenges.

Prerequisite: None

Native Languages, Level 2, Open**LNOBO**

This course will enable students to experience the unique respect for life that permeates Native languages and cultures. Students will expand their vocabulary and knowledge of phrases and expressions, using them in simple dialogues, narrative writing, grammatical constructions, and reading, and to exchange information electronically.

Prerequisite: Native language in elementary school, successful completion of LNOAO, or demonstrated proficiency.

Civics and Citizenship – An Indigenous Perspective, Grade 10, Open (.5 credit)**CHV2ON**

This course explores rights and responsibilities associated with being an active citizen in a democratic society. Students will explore issues of civic importance such as healthy schools, community planning, environmental responsibility, and the influence of social media, while developing their understanding of the role of civic engagement and of political processes in the local, national, and/or global community. Students will apply the concepts of political thinking and the political inquiry process to investigate, and express informed opinions about, a range of political issues and developments that are both of significance in today's world and of personal interest to them.

Prerequisite: None

Note: Choose this course if you are interested in learning about the governance model used in Indigenous society in its relation to national government. If you choose this course, you must also choose GLC2ON (Career Studies – An Indigenous Perspective).

Career Studies – An Indigenous Perspective, Grade 10, Open (.5 credit)**GLC2ON**

This course teaches students how to develop and achieve personal goals for future learning, work, and community involvement. Students will assess their interests, skills, and characteristics and investigate current economic and workplace trends, work opportunities, and ways to search for work. The course explores postsecondary learning and career options, prepares students for managing work and life transitions, and helps students focus on their goals through the development of a career plan.

Prerequisite: None

Note: Choose this course to explore educational pathways, traditional and emerging careers and occupations while using the Be Real Game. If you choose this course, you must also choose CHV2ON (Career Studies – An Indigenous Perspective).

First Nations, Métis, and Inuit in Canada, Grade 10, Open**NAC20**

This course explores the histories of First Nations and Inuit in Canada from precontact, as well as Métis from their beginnings to the present day. Students will examine the continuing impact of past social, cultural, economic, political, and legal trends and developments on First Nations, Métis and Inuit individuals and communities. Students will apply the concepts of historical thinking and the historical inquiry process to investigate a range of issues, events, and interactions that have affected First Nations, Métis, and Inuit individuals and communities, including those that continue to affect relations between Indigenous and non-Indigenous peoples in Canada.

Prerequisite: None

Native Languages, Level 3, Open**LNOCO**

This course will provide students an opportunity to expand their knowledge of a Native language and of Native philosophy, spirituality, and values, and to enhance their identity and self-worth. Students will communicate by using a variety of phrases and expressions, create short conversations, skits, stories, and narratives, use information technology, and develop an awareness of the structural and functional workings of a Native language.

Prerequisite: Successful completion of LNOBO or demonstrated proficiency.

Faith and Culture: World Religions, Grade 11, Open**HRF3ON**

This course engages students in the examination of world religions, particularly Judaism, Christianity and Islam, First Nations, Métis and Inuit Spiritualities, and locally appropriate religious tradition(s), if suitable. This is a survey course that will help students understand the basic similarities and differences between the religious traditions so they can interact with others with acceptance and familiarity. Ontario is a multi-faith global community. Students will deepen their understanding of the various faith traditions in their local community and around the world.

Prerequisite: None

English: Understanding Contemporary First Nations, Métis, and Inuit Voices, Grade 11, College Preparation**NBE3C**

This course explores the themes, forms, and stylistic elements of literary, informational, graphic, oral, cultural, and media text forms emerging from First Nations, Métis, and Inuit cultures in Canada, and also looks at the perspectives and influences of texts that relate to those cultures. In order to understand contemporary text forms and their themes of identity, relationship, and self-determination, sovereignty, or self-governance, students will study the use of text forms by Indigenous authors/creators from other periods in expressing ideas related to these themes. Students will also create oral, written, and media texts to explore their own ideas and understanding, focusing on the development of literacy, communication, and critical and creative thinking skills necessary for success in academic and daily life. The course is intended to prepare students for the compulsory Grade 12 English college preparation course.

Prerequisite: ENG2D, ENG2DA or ENG2P

English: Understanding Contemporary First Nations, Métis, and Inuit Voices, Grade 11, Workplace Preparation**NBE3E**

This course explores themes, forms, and stylistic elements of literary, informational, graphic, oral, cultural, and media texts emerging from First Nations, Métis, and Inuit cultures in Canada, as well as some texts that relate to those cultures. In order to better understand contemporary texts, students will explore connections between traditional and contemporary text forms and cultural and community aspects of identity, relationships, and self-determination, sovereignty, or self-governance. Students will also create oral, written, and media texts focusing on the development of literacy, communication, and critical thinking skills necessary for success in the workplace and daily life. The course is intended to prepare students for the compulsory Grade 12 English workplace preparation course.

Prerequisite: ENG2D, ENG2DA or ENG2P

English: Understanding Contemporary First Nations, Métis, and Inuit Voices, Grade 11, University Preparation**NBE3U**

This course explores the themes, forms, and stylistic elements of a variety of literary, informational, graphic, oral, cultural, and media text forms emerging from First Nations, Métis, and Inuit cultures in Canada, and also examines the perspectives and influence of texts that relate to those cultures. In order to fully understand contemporary text forms and their themes of identity, relationship, and self-determination, sovereignty, or self-governance, students will analyse the changing use of text forms by Indigenous authors/creators from various periods and cultures in expressing ideas related to these themes. Students will also create oral, written, and media texts to explore their own ideas and understanding, focusing on the development of literacy, communication, and critical and creative thinking skills necessary for success in academic and daily life. The course is intended to prepare students for the compulsory Grade 12 English university or college preparation course.

Prerequisite: ENG2D or ENG2DA

World Views and Aspirations of First Nations, Métis, and Inuit Communities in Canada, Grade 11, College **NBV3C**

This course explores the diverse knowledge, world views, and aspirations that shape the actions of First Nations, Métis, and Inuit individuals and communities in Canada. Students will examine the historical and contemporary context of those beliefs, values, aspirations, and actions, including the impact of colonization and decolonization. Students will explore the factors that shape world views to develop an understanding of how acknowledging diverse cultures, values, and ways of knowing contributes to truth, reconciliation, and renewed nation-to-nation relationships. Students are also given the opportunity to develop their own problem-solving strategies to build mutual understanding related to First Nations, Métis, and Inuit world views and aspirations.

Prerequisite: NAC20, CHC2D, CHC2DA or CHC2P

World Views and Aspirations of First Nations, Métis, and Inuit Communities in Canada, Grade 11, Workplace Preparation **NBV3E**

This course explores diverse knowledge, world views, and aspirations that shape the actions of First Nations, Métis, and Inuit individuals and communities in Canada. Students will examine issues of identity facing First Nations, Métis, and Inuit individuals and communities with respect to changing relationships with the land, nature, one another, and Canada. Students will explore their own and others' world views, and the factors that shape world views over time, to develop an understanding of how traditional and contemporary beliefs and values influence the aspirations and practices of First Nations, Métis, and Inuit communities. Students are given the opportunity to develop further understanding about the impacts of colonization and how reconciling diverse knowledge, world views, and aspirations contributes to a call for societal understanding.

Prerequisite: NAC20, CHC2D, CHC2DA or CHC2P

Contemporary First Nations, Métis, and Inuit Issues and Perspectives, Grade 11, University/College **NDA3M**

This course explores existing and emerging issues of local, regional, and national importance to First Nations, Métis, and Inuit in Canada. Students will analyse diverse perspectives on issues and events related to land, community, governance, identity, culture, and global trends. Using the concepts of political thinking and the tools of political inquiry, students will explore their own and others' ideas and investigate issues to determine what needs to change and why. Students are also given the opportunity to develop their own problem-solving strategies to address an issue of their choice.

Prerequisite: NAC20, CHC2D, CHC2DA or CHC2P

Native Languages, Level 4, Open **LNODO**

This course will provide students with opportunities to further develop their knowledge of a Native language and of Native philosophy, spirituality, and values, and to enhance their sense of identity and self-worth. Students will increase their vocabulary and their facility in using idioms, and will use the Native language to analyse literature, discuss various issues that affect the local community, and exchange information electronically.

Prerequisite: Successful completion of LNOCO or demonstrated proficiency.

First Nations, Métis, and Inuit Governance in Canada Grade 12, University/College Preparation **NDG4M**

This course investigates how Aboriginal governments exercise authority and demonstrate responsibilities associated with governance in Canada. Students will explore Aboriginal world views regarding identity, relationships among Aboriginal peoples and between Aboriginal peoples and other Canadians, and Aboriginal definitions of sovereignty. Students will also compare traditional and contemporary forms of Aboriginal governance and will examine Aboriginal and Canadian relations, focusing on empowerment and the inherent right to self-government.

Prerequisite: Any Grade 11 university, university/college, or college preparation course in First Nations, Métis, and Inuit Studies

Contemporary Indigenous Issues and Perspectives in a Global Context, Grade 12, University/College Preparation **NDW4M**

This course provides students with an overview of the issues and challenges that confront indigenous peoples worldwide. Students will develop an understanding of the concerns and aspirations of the world's indigenous population, plan and conduct research on global issues that have an impact on indigenous peoples and use information technology to consult materials related to the views of indigenous peoples throughout the world.

Prerequisite: Any Grade 11 university, university/college, or college preparation course in First Nations, Métis, and Inuit Studies

Outdoor Education Program - SCOPE

Grade 9

Outdoor Education, Grade 9, Open

PAD10

This course equips students with the knowledge and skills they need to make healthy choices now and lead healthy, active lives in the future. Through participation in a wide range of physical activities, students develop knowledge and skills related to movement competence and personal fitness that provide a foundation for active living. Students also acquire an understanding of the factors and skills that contribute to healthy development and learn how their own well-being is affected by, and affects, the world around them. Students build their sense of self, learn to interact positively with others, and develop their ability to think critically and creatively.

Prerequisite: None

Religious Education: Discipleship and Culture, Grade 9, Open

HRE10G

This course is designed as a single credit course. It is based upon specialized programs which offer particular curriculum focus on the natural environment and outdoor studies in order to help students meet diploma requirements and make the transition to postsecondary destinations (i.e. university, college, apprenticeship, or the work place). Placement for the course will be held at St. Kateri Outdoor Learning Centre, Sault College and various agencies in the community. Course expectations will be based upon curriculum expectations from all the courses offered within the program that relate to a career in outdoor studies.

Prerequisite: None

Grade 10

Outdoor Education, Grade 10, Open

PAD20

This course enables students to further develop the knowledge and skills they need to make healthy choices now and lead healthy, active lives in the future. Through participation in a wide range of physical activities, students develop knowledge and skills related to movement competence and personal fitness that provide a foundation for active living. Students also acquire an understanding of the factors and skills that contribute to healthy development and learn how their own well-being is affected by, and affects, the world around them. Students build their sense of self, learn to interact positively with others, and develop their ability to think critically and creatively.

Prerequisite: None

Creating Opportunities Through Co-op, Grade 11, Open

DCO30G

This course consists of a learning experience connected to a community and a cooperative education curriculum focused on developing skills, knowledge, and habits of mind that will support students in their learning, including their education and career/life planning, at school and beyond, today and in the future. Within the context of their experience connected to a community, students will apply skills, knowledge, and habits of mind that will protect and promote their health, safety, and well-being and that will strengthen their inquiry, decision-making, and leadership skills. Students will create and implement a learning plan that meets their particular interests and needs, reflect on their learning, and make connections between their experience in the community and other aspects of their lives.

Prerequisite: None

Grade 11

Outdoor Education, Grade 11, Open

PAD30

This course focuses on the development of a healthy lifestyle through instruction and participation in a variety of enjoyable outdoor physical activities that have the potential to engage students' interest throughout their lives. Students will be encouraged to develop personal competence in a variety of outdoor skills and will be given opportunities to practice goal-setting, decision-making, social, and interpersonal skills. Students will also study the components of wilderness first aid and safe practices, psychology of adventure pursuits, and personal wilderness ethics.

Prerequisite: None

Co-operative Education, Grade 11, Open

COP3X (PAD30K)

This course is designed as a single credit course. It is based upon specialized programs which offer particular curriculum focus on the natural environment and outdoor studies in order to help students meet diploma requirements and make the transition to postsecondary destinations (i.e. university, college, apprenticeship, or the work place). Placement for the course will be held at St. Kateri Outdoor Learning Centre, Sault College and various agencies in the community. Course expectations will be based upon curriculum expectations from all the courses offered within the program that relate to a career in outdoor studies.

Prerequisite: None

Grade 12

Outdoor Education, Grade 12, Open

PAD4O

This course focuses on the development of a healthy lifestyle through instruction and participation in a variety of enjoyable outdoor physical activities that have the potential to engage students' interest throughout their lives. Students will be encouraged to develop personal competence in a variety of outdoor skills and will be given opportunities to practice goal-setting, decision-making, social, and interpersonal skills. Students will also study the components of wilderness first aid and safe practices, psychology of adventure pursuits, and personal wilderness ethics. This course builds on previous Outdoor education experiences, incorporating higher skill and knowledge development and providing opportunities for leadership development wherever possible.

Prerequisite: None

Co-operative Education, Grade 12, Open

COP4X (PAD40K)

This course is designed as a single credit course. It is based upon specialized programs which offer particular curriculum focus on the natural environment and outdoor studies in order to help students meet diploma requirements and make the transition to postsecondary destinations (i.e. university, college, apprenticeship, or the work place). Placement for the course will be held at St. Kateri Outdoor Learning Centre, Sault College and various agencies in the community. Course expectations will be based upon curriculum expectations from all the courses offered within the program that relate to a career in outdoor studies.

Prerequisite: None

GRADE 9 COURSES

The Arts

Drama, Grade 9, Open

ADA10

This course provides opportunities for students to explore dramatic forms and techniques, using material from a wide range of sources and cultures. Students will use the elements of drama to examine situations and issues that are relevant to their lives. Students will create, perform, discuss, and analyse drama, and then reflect on the experiences to develop an understanding of themselves, the art form, and the world around them.

Prerequisite: None

Music, Grade 9, Open

AMU10

This course emphasizes the creation and performance of music at a level consistent with previous experience and is aimed at developing technique, sensitivity, and imagination. Students will develop musical literacy skills by using the creative and critical analysis processes in composition, performance, and a range of reflective and analytical activities. Students will develop an understanding of the conventions and elements of music and of safe practices related to music, and will develop a variety of skills transferable to other areas of their life. Course note: This course integrates four options of music: Band, Guitar, Orchestra/Strings and Vocal/Choral.

Prerequisite: None

Dance, Grade 9, Open

ATC10

This course gives students the opportunity to explore their technical and compositional skills by applying the elements of dance and the tools of composition in a variety of performance situations. Students will generate movement through structured and unstructured improvisation, demonstrate an understanding of safe practices with regard to themselves and others in the dance environment, and identify the function and significance of dance within the global community.

Prerequisite: None

Visual Arts, Grade 9, Open

AVI10

This course is exploratory in nature, offering an overview of visual arts as a foundation for further study. Students will become familiar with the elements and principles of design and the expressive qualities of various materials by using a range of media, processes, techniques, and styles. Students will use the creative and critical analysis processes and will interpret art within a personal, contemporary, and historical context.

Prerequisite: None

Business

Building the Entrepreneurial Mindset, Grade 9, Open

BEM10

In this course, students will learn what makes an entrepreneur thrive and the skills required to succeed in today's business environment. Students will begin to develop their own entrepreneurial mindset, and learn why it's important to take initiative, adapt to change, find creative solutions, and understand the financial considerations of entrepreneurship. This hands-on course will use business software and applications to help students plan and develop their entrepreneurial ideas and learn how to present them to a target audience. Throughout the course, students will enhance their communications skills as well as develop and refine their project management skills, including goal setting, time management, and networking.

Prerequisite: None

Canadian and World Studies

Exploring Canadian Geography, Grade 9, De-streamed

CGC1W

This course builds on learning in Grades 7 and 8 in geography. Students will explore relationships within and between Canada's natural and human systems and how they interconnect with other parts of the world. Students will also examine environmental and economic issues, and their impact related to topics such as natural resources and industries, careers, land use and responsible development, and sustainability. In addition, students will understand the connections that diverse communities and individuals have with the physical environment and each other throughout Canada, including First Nations, Métis, and Inuit perspectives. Students will apply geographic thinking, use the geographic inquiry process, and use geospatial technologies throughout their investigations.

Prerequisite: None

English

English, Grade 9, Destreamed

ENL1W

This course enables students to continue to develop and consolidate the foundational knowledge and skills that they need for reading, writing, and oral and visual communication. Throughout the course, students will continue to enhance their media literacy and critical literacy skills, and to develop and apply transferable skills, including digital literacy. Students will also make connections to their lived experiences and to society and increase their understanding of the importance of language and literacy across the curriculum.

Prerequisite: None

English, Grade 9, Pre-AP

ENL1WA

This course enables students to continue to develop and consolidate the foundational knowledge and skills that they need for reading, writing, and oral and visual communication. Throughout the course, students will continue to enhance their media literacy and critical literacy skills, and to develop and apply transferable skills, including digital literacy. Students will also make connections to their lived experiences and to society and increase their understanding of the importance of language and literacy across the curriculum. This course is intended to prepare students for the Grade 10 academic English or Grade 10 Pre-AP academic English which leads to university or college preparation courses in Grades 11 and 12.

Prerequisite: None

A student should have a Level 4 / 85% or higher in his/her language strand to select this option. The academic rigor of this course will lead to the preparation for the students to write the Advanced Placement College Board exam in Grade 12.

English, Grade 9, Locally Developed Compulsory Course

ENG1L

This course provides foundational literacy and communication skills to prepare students for success in their daily lives, in the workplace, and in the English Grade 11 Workplace Preparation course. The course is organized by strands that develop listening and talking skills, reading and viewing skills, and writing skills. In all strands, the focus is on developing foundational literacy skills in using language clearly and accurately in a variety of authentic contexts. Students develop strategies and put into practice the processes involved in talking, listening, reading, viewing, writing and thinking and reflect regularly upon their growth in these areas.

Prerequisite: None

French as a Second Language and International Languages

Core French, Grade 9, De-streamed

FSF1D

This course provides opportunities for students to communicate and interact in French with increasing independence, with a focus on familiar topics related to their daily lives. Students will develop their skills in listening, speaking, reading, and writing by using language learning strategies introduced in the elementary Core French program, and will apply creative and critical thinking skills in various ways. They will also enhance their understanding and appreciation of diverse French-speaking communities, and will develop skills necessary for lifelong language learning.

Prerequisite: Minimum of 600 hours of French instruction, or equivalent

Note: Upon completion of four courses, the student will receive the Core French Program Certificate and be eligible to complete the Diplôme d'Études en Langue Française (DELF) test.

Core French, Grade 9, Locally Developed

FSF14

An introductory French course for students with little to no prior French, focusing on practical communication in daily situations, building core listening, speaking, reading and writing skills while fostering appreciation for French-speaking communities in Canada. Students will begin to understand and speak in French while developing fundamental skills in listening, speaking, reading and writing. The course focused on discussing issues while exploring authentic daily life situations in a guided and interactive setting.

Guidance and Career Education

Learning Strategies 1: Skills for Success in Secondary School, Grade 9, Open

GLE10

This course focuses on learning strategies to help students become better, more independent learners. Students will learn how to develop and apply literacy and numeracy skills, personal management skills, and interpersonal and teamwork skills to improve their learning and achievement in school, the workplace, and the community. The course helps students build confidence and motivation to pursue opportunities for success in secondary school and beyond.

Prerequisite: Recommendation of principal.

Health and Physical Education

Healthy Active Living, Physical Education, Grade 9, Open

PPL10**PPL10M – Male PPL10O – Female**

This course equips students with the knowledge and skills they need to make healthy choices now and lead healthy, active lives in the future. Through participation in a wide range of physical activities, students develop knowledge and skills related to movement competence and personal fitness that provide a foundation for active living. Students also acquire an understanding of the factors and skills that contribute to healthy development and learn how their own well-being is affected by, and affects, the world around them. Students build their sense of self, learn to interact positively with others, and develop their ability to think critically and creatively.

Prerequisite: None

Outdoor Education, Grade 9, Open

PAD10

This course equips students with the knowledge and skills they need to make healthy choices now and lead healthy, active lives in the future. Through participation in a wide range of physical activities, students develop knowledge and skills related to movement competence and personal fitness that provide a foundation for active living. Students also acquire an understanding of the factors and skills that contribute to healthy development and learn how their own well-being is affected by, and affects, the world around them. Students build their sense of self, learn to interact positively with others, and develop their ability to think critically and creatively.

Prerequisite: None

Mathematics

Mathematics, Grade 9, Locally Developed

MAT1L

This course emphasizes further development of mathematical knowledge and skills to prepare students for success in their everyday lives, in the workplace, in the Grade 10 LDCC course, and in the Mathematics Grade 11 and Grade 12 Workplace Preparation courses. The course is organized by three strands related to money sense, measurement, and proportional reasoning. In all strands, the focus is on developing and consolidating key foundational mathematical concepts and skills by solving authentic, everyday problems. Students have opportunities to further develop their mathematical literacy and problem-solving skills and to continue developing their skills in reading, writing, and oral language through relevant and practical math activities.

Prerequisite: None

Mathematics, Grade 9, De-streamed

MTH1W

This course enables students to consolidate, and continue to develop, an understanding of mathematical concepts related to number sense and operations, algebra, measurement, geometry, data, probability, and financial literacy. Students will use mathematical processes, mathematical modelling, and coding to make sense of the mathematics they are learning and to apply their understanding to culturally responsive and relevant real-world situations. Students will continue to enhance their mathematical reasoning skills, including proportional reasoning, spatial reasoning, and algebraic reasoning, as they solve problems and communicate their thinking.

Prerequisite: None

Principles of Mathematics, Grade 9, Pre-AP

MTH1WA

This course enables students to develop an understanding of mathematical concepts related to algebra, analytic geometry, and measurement and geometry through investigation, the effective use of technology, and abstract reasoning. Students will investigate relationships, which they will then generalize as equations of lines, and will determine the connections between different representations of a linear relation. They will also explore relationships that emerge from the measurement of three-dimensional figures and two-dimensional shapes. Students will reason mathematically and communicate their thinking as they solve multi-step problems.

Prerequisite: None

A student should have a level 4 / 85% or higher average to consider this course. The academic rigor of this course will lead to the preparation for students to write the Advanced Placement College Board exam in Grade 12.

Native Languages and First Nations, Métis and Inuit Studies

Native Languages, Level 1, Open

LNOAO

This course is open to the entire student body and will allow students who have no prior Native language experience to develop an appreciation for a Native language and culture, to explore and experience a unique world view, and learn to speak a Native language. Students will use the language being studied for greetings and daily routines, become familiar with its writing and sound system, and practice basic vocabulary and phrases. Students will also use information technology during course-related activities.

Prerequisite: None

Expressions of First Nations, Métis, and Inuit Cultures, Grade 9, Open

NAC10

This course explores various arts disciplines (dance, drama, installation and performance art, media arts, music, storytelling, utilitarian or functional art, visual arts), giving students the opportunity to create, present, and analyse art works, including integrated art works/ productions, that explore or reflect First Nations, Métis, and Inuit perspectives and cultures. Students will examine the interconnected relationships between art forms and individual and cultural identities, histories, values, protocols, and ways of knowing and being. They will demonstrate innovation as they learn and apply art-related concepts, methods, and conventions, and acquire skills that are transferable beyond the classroom. Students will use the creative process and responsible practices to explore solutions to creative arts challenges.

Prerequisite: None

Note: This course may be used to meet the compulsory credit requirement for the Arts.

Religious Education

Religious Education: Discipleship and Culture, Grade 9, Open

HRE10

This course engages students in the examination of the Christian narrative as revealed in Sacred Scripture. Students are invited to a deeper understanding of both the joy and the demands of living out the call to discipleship as it is described in the Scriptures. Students explore discipleship as encountered in the Sacred Tradition of the Church (Sacraments, Liturgical Year and Church Teaching and Law), as part of their ongoing personal growth and faith understanding. Students explore Catholic rituals, teaching, practice, morals and values, and virtues to facilitate a healthy and covenantal relationship with self, God and with others. Using theological reflection, they are challenged to explore the connections and disconnections of ethical concepts (euthanasia, abortion, sexuality, etc.) between the Church and contemporary culture. The course focuses on encouraging students to know and love by following in the footsteps of Jesus. As they learn of his words and deeds, they discover the importance of prayerfully serving the community to bring about the Reign of God.

Prerequisite: None

Science

Science, Grade 9, Locally Developed Compulsory Course

SNC1L

This course emphasizes reinforcing and strengthening science-related knowledge and skills, including scientific inquiry, critical thinking and the relationship between science, society, and the environment, to prepare students for success in everyday life, in the workplace and in the Science Grade 11 Workplace Preparation course. Students explore a range of topics including science in daily life, properties of common materials, life-sustaining processes in simple and complex organisms, and electrical circuits. Students have the opportunity to extend mathematical and scientific process skills and to continue developing their skills in reading, writing and or a language through relevant and practical science activities.

Prerequisite: None

Science, Grade 9, Pre-AP

SNC1WA

This course enables students to develop their understanding of basic concepts in biology, chemistry, earth and space science, and physics, and to relate science to technology, society, and the environment. Throughout the course, students will develop their skills in the processes of scientific investigation. Students will acquire an understanding of scientific theories and conduct investigations related to sustainable ecosystems; atomic and molecular structures and the properties of elements and compounds; the study of the universe and its properties and components; and the principles of electricity.

Prerequisite: None

A student should have a level 4 / 85% or higher to consider this course. The academic rigor of this course will lead to further specialization in Gr. 11 and 12 courses in the areas of Biology, Chemistry and Physics in preparation to write the Advanced Placement College Board exam(s) in Grade 12.

Science, Grade 9, De-streamed

SNC1W

This course enables students to develop their understanding of basic concepts in biology, chemistry, earth and space science, and physics, and to relate science to technology, society, and the environment. Throughout the course, students will develop their skills in the processes of scientific investigation. Students will acquire an understanding of scientific theories and conduct investigations related to sustainable ecosystems; atomic and molecular structures and the properties of elements and compounds; the study of the universe and its properties and components; and the principles of electricity.

Prerequisite: None

Technological Education

Exploring Construction Technology

TCJ10

This exploratory course introduces students to concepts and skills in construction technology, which encompasses plumbing, electrical and network wiring, masonry, heating/cooling, carpentry, and woodworking. Students will develop an awareness of related environmental and societal issues, and will begin to explore secondary and postsecondary pathways leading to careers in the field.

Prerequisite: None

Exploring Computer Technology, Grade 9, Open

TEJ10

This exploratory course introduces students to concepts and skills in computer technology, which encompasses computer systems, networking, interfacing, and programming, as well as electronics and robotics. Students will develop an awareness of related environmental and societal issues and will begin to explore secondary and postsecondary pathways leading to careers in the field.

Prerequisite: None

Communications Technology

TGJ10

This exploratory course introduces students to concepts and skills in communications technology, which encompasses television/video and movie production, radio and audio production, print and graphic communications, photography, and interactive new media and animation. Students will develop an awareness of related environmental and societal issues, and will begin to explore secondary and post-secondary pathways leading to careers in the field.

Prerequisite: None

GRADE 10 COURSES

The Arts

Drama, Grade 10, Open

ADA20

This course provides opportunities for students to explore dramatic forms, conventions, and techniques. Students will explore a variety of dramatic sources from various cultures and representing a range of genres. Students will use the elements of drama in creating and communicating through dramatic works. Students will assume responsibility for decisions made in the creative and collaborative processes and will reflect on their experiences.

Prerequisite: None

Music, Grade 10, Open (Guitar)

AMG20

This course emphasizes the creation and performance of music at a level consistent with previous experience. Students will develop musical literacy skills by using the creative and critical analysis processes in composition, performance, and a range of reflective and analytical activities. Students will develop their understanding of musical conventions, practices, and terminology and apply the elements of music in a range of activities. They will also explore the function of music in society with reference to the self, communities, and cultures.

Prerequisite: None

Note: Students will focus their work on the various aspects of musical performance through the study of classical nylon string guitar. Part of the course will focus on the development of techniques for performance on acoustic steel string guitar.

Music, Grade 10, Open (Instrumental/Band)

AMI20

This course emphasizes the creation and performance of music at a level consistent with previous experience. Students will develop musical literacy skills by using the creative and critical analysis processes in composition, performance, and a range of reflective and analytical activities. Students will develop their understanding of musical conventions, practices, and terminology and apply the elements of music in a range of activities. They will also explore the function of music in society with reference to the self, communities, and cultures.

Prerequisite: None

Note: Students will focus their work on the various aspects of musical performance through the study of a woodwind, brass or percussion instrument in a band setting.

Music, Grade 10, Open (Musical Theatre/Voice)

AMV20

This course emphasizes the creation and performance of music at a level consistent with previous experience. Students will develop musical literacy skills by using the creative and critical analysis processes in composition, performance, and a range of reflective and analytical activities. Students will develop their understanding of musical conventions, practices, and terminology and apply the elements of music in a range of activities. They will also explore the function of music in society with reference to the self, communities, and cultures.

Prerequisite: None

Note: Students will focus their work on the various aspects of musical performance through the study of musical theatre, popular music and classical vocal repertoire.

Dance, Grade 10, Open

ATC20

This course emphasizes the development of students' technique and creative skills relating to the elements of dance and the tools of composition in a variety of performance situations. Students will identify responsible personal and interpersonal practices related to dance processes and production, and will apply technologies and techniques throughout the process of creation to develop artistic scope in the dance arts.

Prerequisite: None

Visual Arts, Grade 10, Open

AVI20

This course enables students to develop their skills in producing and presenting art by introducing them to new ideas, materials, and processes for artistic exploration and experimentation. Students will apply the elements and principles of design when exploring the creative process. Students will use the critical analysis process to reflect on and interpret art within a personal, contemporary, and historical context.

Prerequisite: None

Visual Design, Grade 10, Open

AWD20

This course enables students to develop their skills in producing and presenting art by introducing them to new ideas, materials, and processes for artistic exploration and experimentation. Students will apply the elements and principles of design when exploring the creative process. Students will use the critical analysis process to reflect on and interpret art within a personal, contemporary, and historical context.

Prerequisite: None

Note: This course will be delivered as a comprehensive program with a variety of art forms. Students will gain experience in a variety of mediums using both traditional and emerging technologies.

Business Studies

Launching and Leading a Business, Grade 10, Open

BEP20

This course introduces students to the world of business and what is required to be successful, ethical, and responsible in today's economy. Students will develop the knowledge and skills needed to be an entrepreneur who knows how to respond to local and global market opportunities. Throughout the course, students will explore and understand the responsibility of managing different functions of a business. This includes accounting, marketing, information and communication technology, financial management, human resources, and production.

Prerequisite: None

Canadian and World Studies

Canadian History since World War I, Grade 10, Academic

CHC2D

This course explores social, economic, and political developments and events and their impact on the lives of different groups in Canada since 1914. Students will examine the role of conflict and cooperation in Canadian society, Canada's evolving role within the global community, and the impact of various individuals, organizations, and events on Canadian identity, citizenship, and heritage. They will develop their ability to apply the concepts of historical thinking and the historical inquiry process, including the interpretation and analysis of evidence, when investigating key issues and events in Canadian history since 1914.

Prerequisite: None

Canadian History since World War I, Grade 10, Locally Developed

CHC2L

The study of history fulfils a fundamental human desire to understand the past. Through the narrative of history, students learn about the people, events, emotions, struggles, and challenges that produced the present and that will shape the future. The study of history enables students to become critically thoughtful and informed citizens who are able to interpret and analyse historical, as well as current issues, events and developments, both in Canada and the world. This course focuses on the social context of historical developments and events and how they have affected the lives of people in Canada since 1914. Students will explore interactions between various communities in Canada as well as contributions of individuals and groups to Canadian heritage and identity. Students will develop their ability to apply the concepts of historical thinking and the historical inquiry process, including the interpretation and analysis of evidence when investigating the continuing relevance of historical developments and how they have helped shape communities in present-day Canada.

Prerequisite: None

Canadian History since World War I, Grade 10, Applied

CHC2P

This course focuses on the social context of historical developments and events and how they have affected the lives of people in Canada since 1914. Students will explore interactions between various communities in Canada as well as contributions of individuals and groups to Canadian heritage and identity. Students will develop their ability to apply the concepts of historical thinking and the historical inquiry process, including the interpretation and analysis of evidence, when investigating the continuing relevance of historical developments and how they have helped shape communities in present-day Canada.

Prerequisite: None

**Civics and Citizenship, Grade 10, Open (.5 credit)****CHV20**

This course explores rights and responsibilities associated with being an active citizen in a democratic society. Students will explore issues of civic importance such as healthy schools, community planning, environmental responsibility, and the influence of social media, while developing their understanding of the role of civic engagement and of political processes in the local, national, and/or global community. Students will apply the concepts of political thinking and the political inquiry process to investigate, and express informed opinions about, a range of political issues and developments that are both of significance in today's world and of personal interest to them.

Corequisites: If you take this course, you must also take GLC20 (.5 credit)

Prerequisite: None

Civics and Citizenship – An Indigenous Perspective, Grade 10, Open (.5 credit)**CHV20N**

This course explores rights and responsibilities associated with being an active citizen in a democratic society. Students will explore issues of civic importance such as healthy schools, community planning, environmental responsibility, and the influence of social media, while developing their understanding of the role of civic engagement and of political processes in the local, national, and/or global community. Students will apply the concepts of political thinking and the political inquiry process to investigate, and express informed opinions about, a range of political issues and developments that are both of significance in today's world and of personal interest to them.

Prerequisite: None

Note: Choose this course if you are interested in learning about the governance model used in Indigenous society in its relation to national government. If you choose this course, you must also choose GLC20N (Career Studies – An Indigenous Perspective) (.5 credit).

Computer Studies

Digital Technology and Innovations in the Changing World, Grade 10, Open**ICD20**

This course helps students develop cutting-edge digital technology and computer programming skills that will support them in contributing to and leading the global economic, scientific and societal innovations of tomorrow. Students will learn and apply coding concepts and skills to build hands-on projects and investigate artificial intelligence, cybersecurity, and other emerging digital technologies that connect to a wide range of fields and careers. Using critical thinking skills with a focus on digital citizenship, students will investigate the appropriate use and development of the digital technologies that they encounter every day, as well as the benefits and limitations of these technologies.

Prerequisite: None

English

English, Grade 10, Academic**ENG2D**

This course is designed to extend the range of oral communication, reading, writing, and media literacy skills that students need for success in their secondary school academic programs and in their daily lives. Students will analyse literary texts from contemporary and historical periods, interpret and evaluate informational and graphic texts, and create oral, written, and media texts in a variety of forms. An important focus will be on the selective use of strategies that contribute to effective communication. This course is intended to prepare students for the compulsory Grade 11 university or college preparation course.

Prerequisite: ENL1W, ENL1WA, ENG1D, ENG1DA or ENG1P

English, Grade 10, Pre-AP**ENG2DA**

This course is designed to extend the range of oral communication, reading, writing, and media literacy skills that students need for success in their secondary school academic programs and in their daily lives. Students will analyse literary texts from contemporary and historical periods, interpret and evaluate informational and graphic texts, and create oral, written, and media texts in a variety of forms. An important focus will be on the selective use of strategies that contribute to effective communication. This course is intended to prepare students for the compulsory Grade 11 university or college preparation course. This course will prepare students to write the Advanced Placement exam in Grade 12.

Prerequisite: ENL1W, ENL1WA, ENG1D or ENG1DA

English, Grade 10, Locally Developed Compulsory Course

ENG2L

In this course, students focus on extending their literacy and communication skills to prepare for success in their daily lives, in the workplace or in the English Grade 11 Workplace Preparation course. The course is organized by strands that extend listening and talking skills, reading and viewing skills, and writing skills. In all strands, the focus is on refining foundational literacy skills and in using language clearly and accurately in a variety of authentic contexts. Students build on their strategies and engage in the processes involved in talking, listening, reading, viewing, writing and thinking, and reflect regularly upon their growth in these areas.

Prerequisite: ENL1W, ENL1WA, ENG1D, ENG1DA, ENG1P or ENG1L

English, Grade 10, Applied

ENG2P

This course is designed to extend the range of oral communication, reading, writing, and media literacy skills that students need for success in secondary school and daily life. Students will study and create a variety of informational, literary, and graphic texts. An important focus will be on the consolidation of strategies and processes that help students interpret texts and communicate clearly and effectively. This course is intended to prepare students for the compulsory Grade 11 college or workplace preparation course.

Prerequisite: ENL1W, ENL1WA, ENG1D, ENG1DA or ENG1P

French as a Second Language and International Languages

Core French, Grade 10, Academic

FSF2D

This course provides opportunities for students to communicate in French about personally relevant, familiar, and academic topics in real-life situations with increasing independence. Students will exchange information, ideas, and opinions with others in guided and increasingly spontaneous spoken interactions. Students will develop their skills in listening, speaking, reading, and writing through the selective use of strategies that contribute to effective communication. They will also increase their understanding and appreciation of diverse French-speaking communities, and will develop skills necessary for lifelong language learning.

Prerequisite: FSF1D

Note: Upon completion of four courses, the student will receive the Core French Program Certificate and be eligible to complete the Diplôme d'Études en Langue Française (DELF) test.

Guidance and Career Education

Career Studies, Grade 10, Open (.5 credit)

GLC2O

This course teaches students how to develop and achieve personal goals for future learning, work, and community involvement. Students will assess their interests, skills, and characteristics and investigate current economic and workplace trends, work opportunities, and ways to search for work. The course explores postsecondary learning and career options, prepares students for managing work and life transitions, and helps students focus on their goals through the development of a career plan.

Corequisites: If you take this course, you must also take CHV2O (.5 credit)

Prerequisite: None

Career Studies – An Indigenous Perspective, Grade 10, Open (.5 credit)

GLC2ON

This course teaches students how to develop and achieve personal goals for future learning, work, and community involvement. Students will assess their interests, skills, and characteristics and investigate current economic and workplace trends, work opportunities, and ways to search for work. The course explores postsecondary learning and career options, prepares students for managing work and life transitions, and helps students focus on their goals through the development of a career plan.

Corequisites: If you take this course, you must also take CHV2ON (.5 credit)

Prerequisite: None

Note: Choose this course to explore educational pathways, traditional and emerging careers and occupations while using the Be Real Game.

Discovering the Workplace, Grade 10, Open

GLD20

This course provides students with opportunities to discover and develop the workplace essential skills and work habits required to be successfully employed. Students will develop an understanding of work through practical hands-on experience in the school and in the community, using real workplace materials. They investigate occupations of interest through experiential learning opportunities, such as worksite visits, job shadowing, work experience, simulations, and entrepreneurial projects. This course helps students make plans for continued learning and work.

Prerequisite: None

Learning Strategies: Skills for Success in Secondary School, Grade 10, Open

GLE20

This course focuses on learning strategies to help students become better, more independent learners. Students will learn how to develop and apply literacy and numeracy skills, personal management skills, and interpersonal and teamwork skills to improve their learning and achievement in school, the workplace, and the community. The course helps students build confidence and motivation to pursue opportunities for success in secondary school and beyond.

Prerequisite: Recommendation of principal.

Health and Physical Education

Healthy Active Living Education, Grade 10, Open

PPL20**PPL20M – Male PPL20O – Female**

This course enables students to further develop the knowledge and skills they need to make healthy choices now and lead healthy, active lives in the future. Through participation in a wide range of physical activities, students develop knowledge and skills related to movement competence and personal fitness that provide a foundation for active living. Students also acquire an understanding of the factors and skills that contribute to healthy development and learn how their own well-being is affected by, and affects, the world around them. Students build their sense of self, learn to interact positively with others, and develop their ability to think critically and creatively.

Prerequisite: None

Outdoor Education, Grade 10, Open

PAD20

This course enables students to further develop the knowledge and skills they need to make healthy choices now and lead healthy, active lives in the future. Through participation in a wide range of physical activities, students develop knowledge and skills related to movement competence and personal fitness that provide a foundation for active living. Students also acquire an understanding of the factors and skills that contribute to healthy development and learn how their own well-being is affected by, and affects, the world around them. Students build their sense of self, learn to interact positively with others, and develop their ability to think critically and creatively.

Prerequisite: None

Mathematics

Foundations of Mathematics, Grade 10, Applied

MFM2P

This course enables students to consolidate their understanding of linear relations and extend their problem-solving and algebraic skills through investigation, the effective use of technology, and hands-on activities. Students will develop and graph equations in analytic geometry; solve and apply linear systems, using real-life examples; and explore and interpret graphs of quadratic relations. Students will investigate similar triangles, the trigonometry of right triangles, and the measurement of three-dimensional figures. Students will consolidate their mathematical skills as they solve problems and communicate their thinking.

Prerequisite: MFM1P, MPM1D, MTH1W, MTH1WA or MPM1DA

Principles of Mathematics, Grade 10, Academic

MPM2D

This course enables students to broaden their understanding of relationships and extend their problem-solving and algebraic skills through investigation, the effective use of technology, and abstract reasoning. Students will explore quadratic relationships and their applications; solve and apply linear systems; verify properties of geometric figures using analytic geometry; and investigate the trigonometry of right and acute triangles. Students will reason mathematically as they solve multi-step problems and communicate their thinking.

Prerequisite: MPM1D, MPM1DA, MTH1W or MTH1WA

**Mathematics, Grade 10, Pre-AP****MPM2DA**

This course enables students to broaden their understanding of relationships and extend their problem-solving and algebraic skills through investigation, the effective use of technology, and abstract reasoning. Students will explore quadratic relations and their applications; solve and apply linear systems; verify properties of geometric figures using analytic geometry; and investigate the trigonometry of right and acute triangles. Students will reason mathematically as they solve multi-step problems and communicate their thinking. This course will continue to prepare students to write the Advanced Placement exam in Grade 12.

Prerequisite: MPM1D, MPM1DA, MTH1W or MTH1WA

Native Languages and First Nations, Métis and Inuit Studies**Native Languages, Level 2, Open****LNOBO**

This course will enable students to experience the unique respect for life that permeates Native languages and cultures. Students will expand their vocabulary and knowledge of phrases and expressions, using them in simple dialogues, narrative writing, grammatical constructions, and reading, and to exchange information electronically.

Prerequisite: Native language in elementary school, successful completion of LNOAO, or demonstrated proficiency.

First Nations, Métis, and Inuit in Canada, Grade 10, Open**NAC2O**

This course explores the histories of First Nations and Inuit in Canada from precontact, as well as Métis from their beginnings, to the present day. Students will examine the continuing impact of past social, cultural, economic, political, and legal trends and developments on First Nations, Métis and Inuit individuals and communities. Students will apply the concepts of historical thinking and the historical inquiry process to investigate a range of issues, events, and interactions that have affected First Nations, Métis, and Inuit individuals and communities, including those that continue to affect relations between Indigenous and non-Indigenous peoples in Canada.

Prerequisite: None

Religious Education**Religious Education: “Christ and Culture”, Grade 10, Open****HRE2O**

This course both invites and challenges the adolescent to personalize the Gospel values and social justice principles that guide Catholics in understanding their role in shaping culture as disciples of Jesus. Students will explore such foundational topics as: what it means to be human, created in God’s image, what is culture, Christ and culture, living together in solidarity, social justice, prayer and sacrament, friendship and intimacy. Connections between the living Church and contemporary culture are explored in terms of what it means to be a responsible Christian adolescent in a secularized, pluralistic world.

Prerequisite: None

Science**Science, Grade 10, Academic****SNC2D**

This course enables students to enhance their understanding of concepts in biology, chemistry, earth and space science, and physics, and of the interrelationships between science, technology, society, and the environment. Students are also given opportunities to further develop their scientific investigation skills. Students will plan and conduct investigations and develop their understanding of scientific theories related to the connections between cells and systems in animals and plants; chemical reactions, with a particular focus on acid–base reactions; forces that affect climate and climate change; and the interaction of light and matter.

Prerequisite: SNC1D, SNC1DA, SNC1P, SNC1W or SNC1WA

Science, Grade 10, Pre-AP

SNC2DA

This course enables students to enhance their understanding of concepts in biology, chemistry, earth and space science, and physics, and of the interrelationships between science, technology, society, and the environment. Students are also given opportunities to further develop their scientific investigation skills. Students will plan and conduct investigations and develop their understanding of scientific theories related to the connections between cells and systems in animals and plants; chemical reactions, with a particular focus on acid–base reactions; forces that affect climate and climate change; and the interaction of light and matter. This enriched program is designed to continue preparation for the Advanced Placement exam in Grade 12.

Prerequisite: SNC1D, SNC1DA, SNC1W or SNC1WA

Science, Grade 10, Locally Developed Compulsory Course

SNC2L

This course emphasizes reinforcing and strengthening science-related knowledge and skills, including scientific inquiry, critical thinking, and the environmental impact of science and technology, to prepare students for success in everyday life, in the workplace and in the Science Grade 11 Workplace Preparation course. Students explore a range of topics including science in the media, interactions of common materials, interdependence of organisms in communities, and using electrical energy. Students have the opportunity to extend mathematical and scientific process skills, and to continue developing their skills in reading, writing, and oral language through relevant and practical science activities.

Prerequisite: None

Science, Grade 10, Applied

SNC2P

This course enables students to develop a deeper understanding of concepts in biology, chemistry, earth and space science, and physics, and to apply their knowledge of science in real-world situations. Students are given opportunities to develop further practical skills in scientific investigation. Students will plan and conduct investigations into everyday problems and issues related to human cells and body systems; chemical reactions; factors affecting climate change; and the interaction of light and matter.

Prerequisite: SNC1W, SNC1WA

Social Sciences and Humanities

Food and Nutrition, Grade 10, Open

HFN2O

This course focuses on guidelines for making nutritious food choices. Students will investigate factors that influence food choices, including beliefs, attitudes, current trends, traditional eating patterns, food marketing strategies, and individual needs. Students will also explore the environmental impact of a variety of food choices at the local and global level. The course provides students with opportunities to develop food preparation skills and introduces them to the use of social science research methods in the area of food and nutrition.

Prerequisite: None

Technological Education

Construction Technology, Grade 10, Open

TCJ2O

This course introduces students to building materials and processes through opportunities to design and build various construction projects. Students will learn to create and read working drawings; become familiar with common construction materials, components, and processes; and perform a variety of fabrication, assembly, and finishing operations. They will use a variety of hand and power tools and apply knowledge of imperial and metric systems of measurement, as appropriate. Students will develop an awareness of environmental and societal issues related to construction technology, and will explore secondary and postsecondary pathways leading to careers in the industry.

Prerequisite: None

Communication Technology, Grade 10, Open

TGJ20

This course introduces students to communications technology from a media perspective. Students will work in the areas of TV/video and movie production, radio and audio production, print and graphic communications, photography, and animation. Student projects may include computer-based activities such as creating videos, editing photos, working with audio, cartooning, developing animations, and designing web pages. Students will also develop an awareness of environmental and societal issues related to communications technology and explore secondary and postsecondary education and training pathways and career opportunities in the various communications technology fields.

Prerequisite: None

Transportation Technology, Grade 10, Open

TTJ20

This course introduces students to the service and maintenance of vehicles, aircraft, and/or watercraft. Students will develop knowledge and skills related to the construction and operation of vehicle/craft systems and learn maintenance and repair techniques. Student projects may include the construction of a self-propelled vehicle or craft, engine service, tire/wheel service, electrical/battery service, and proper body care. Students will develop an awareness of related environmental and societal issues and will explore secondary and postsecondary pathways leading to careers in the transportation industry.

Prerequisite: None

GRADE 11 COURSES

The Arts

Drama, Grade 11, College/University

ADA3M

This course requires students to create and perform in dramatic presentations. Students will analyse, interpret, and perform dramatic works from various cultures and time periods. Students will research various acting styles and conventions that could be used in their presentations, and analyse the functions of playwrights, directors, actors, designers, technicians, and audiences.

Prerequisite: ADA2O or ADA1O

Music, Grade 11, College/University (Guitar)

AMG3M

This course provides students with opportunities to develop their musical literacy through the creation, appreciation, analysis, and performance of music, including traditional, commercial, and art music. Students will apply the creative process when performing appropriate technical exercises and repertoire and will employ the critical analysis processes when reflecting on, responding to, and analysing live and recorded performances. Students will consider the function of music in society and the impact of music on individuals and communities. They will explore how to apply skills developed in music to their life and careers.

Prerequisite: AMU1O or AMG2O

Note: Students will focus their work on the various aspects of musical performance through the study of classical nylon string guitar. Part of the course will focus on the development of techniques for performance on acoustic steel string guitar.

Music, Grade 11, College/University (Instrumental/Band)

AMI3M

This course provides students with opportunities to develop their musical literacy through the creation, appreciation, analysis, and performance of music, including traditional, commercial, and art music. Students will apply the creative process when performing appropriate technical exercises and repertoire and will employ the critical analysis processes when reflecting on, responding to, and analysing live and recorded performances. Students will consider the function of music in society and the impact of music on individuals and communities. They will explore how to apply skills developed in music to their life and careers.

Prerequisite: AMU1O or AMI2O

Note: Students will focus their work on the various aspects of musical performance through the study of a woodwind, brass or percussion instrument in a band setting.

Music, Grade 11, College/University (Voice)

AMV3M

This course provides students with opportunities to develop their musical literacy through the creation, appreciation, analysis, and performance of music, including traditional, commercial, and art music. Students will apply the creative process when performing appropriate technical exercises and repertoire and will employ the critical analysis processes when reflecting on, responding to, and analysing live and recorded performances. Students will consider the function of music in society and the impact of music on individuals and communities. They will explore how to apply skills developed in music to their life and careers.

Prerequisite: AMU1O or AMV2O

Note: Students will focus their work on the various aspects of musical performance through the study of musical theatre, popular music and classical vocal repertoire.

Dance, Grade 11, Open

ATC3O

This course emphasizes the development of students' movement vocabulary relating to dance genres from around the world, and of their understanding of the elements of dance and the tools of composition in a variety of performance situations. Students will research and explain how physical, intellectual, and artistic skills developed in dance can be applied in a wide range of careers. They will apply tools and techniques throughout the process of creation and presentation, and reflect on how studies in the dance arts affect personal identity.

Prerequisite: None

Visual Arts, Grade 11, College/University**AVI3M**

This course enables students to further develop their knowledge and skills in visual arts. Students will use the creative process to explore a wide range of themes through studio work that may include drawing, painting, sculpting, and printmaking, as well as the creation of collage, multimedia works, and works using emergent technologies. Students will use the critical analysis process when evaluating their own work and the work of others. The course may be delivered as a comprehensive program or through a program focused on a particular art form (e.g. photography, video, computer graphics, and information design).

Prerequisite: AVI10, AVI20, or AVI10A

Visual Arts – Information/Consumer Design, Grade 11, College/University**AWE3M**

This course enables students to further develop their knowledge and skills in visual arts. Students will use the creative process to explore a wide range of themes through studio work that may include drawing, painting, sculpting, and printmaking, as well as the creation of collage, multimedia works, and works using emergent technologies. Students will use the critical analysis process when evaluating their own work and the work of others. The course may be delivered as a comprehensive program or through a program focused on a particular art form (e.g. photography, video, computer graphics, and information design).

Prerequisite: AVI10, AVI20, AWD20, or AVI10A

Note: Webpage – This course will provide students with the opportunity to develop a variety of webpages. Students will develop webpages using html code, Dreamweaver, Flash and JavaScript.

Visual Arts - Photography, Grade 11, Open**AWQ3O**

This course focuses on studio activities in one or more of the visual arts, including drawing, painting, sculpture, photography, printmaking, collage, and/or multimedia art. Students will use the creative process to create art works that reflect a wide range of subjects and will evaluate works using the critical analysis process. Students will also explore works of art within a personal, contemporary, historical, and cultural context.

Prerequisite: None

Note: This course will provide students with the opportunity to work with Canon Digital Cameras (T5i and T6i) and develop better picture taking skills. Students develop skills to artfully compose images while developing a story to their photos. Students will develop a thorough understanding of the camera and all of its components.

DSLR cameras (Canon T5i) are available for student use.

Business Studies

Financial Accounting Fundamentals, Grade 11, College/University**BAF3M**

This course introduces students to the fundamental principles and procedures of accounting. Students will develop financial analysis and decision-making skills that will assist them in future studies and/or career opportunities in business. Students will acquire an understanding of accounting for a service and a merchandising business, computerized accounting, financial analysis, and current issues and ethics in accounting.

Prerequisite: None

Entrepreneurship: The Venture, Grade 11, College**BDI3C**

This course focuses on ways in which entrepreneurs recognize opportunities, generate ideas, and organize resources to plan successful ventures that enable them to achieve their goals. Students will create a venture plan for a student-run school-based or summer business. Through hands-on experiences, students will have opportunities to develop the values, traits, and skills most often associated with successful entrepreneurs.

Prerequisite: None

Marketing: Goods, Services, Events, Grade 11, College**BMI3Ce**

This course introduces the fundamental concepts of product marketing, which includes the marketing of goods, services, and events. Students will examine how trends, issues, global economic changes, and information technology influence consumer buying habits. Students will engage in marketing research, develop marketing strategies, and produce a marketing plan for a product of their choice.

Prerequisite: None

Canadian and World Studies

Travel and Tourism: A Geographic Perspective, Grade 11, Open

CGG30

This course focuses on issues related to travel and tourism within and between various regions of the world. Students will investigate unique environmental, sociocultural, economic, and political characteristics of selected world regions. They will explore travel patterns and trends as well as tensions related to tourism, and will predict future tourism destinations. Students will apply the concepts of geographic thinking and the geographic inquiry process, including spatial technologies, to investigate the impact of the travel industry on natural environments and human communities.

Prerequisite: CGC1D, CGC1P, or CGC1DA

American History, Grade 11, University

CHA3U

This course explores key aspects of the social, economic, and political development of the United States from pre-contact to the present. Students will examine the contributions of groups and individuals to the country's evolution and will explore the historical context of key issues, trends, and events that have had an impact on the United States, its identity and culture, and its role in the global community. Students will extend their ability to apply the concepts of historical thinking and the historical inquiry process, including the interpretation and analysis of evidence, when investigating various forces that helped shape American history.

Prerequisite: CHC2D, CHC2P, CGC1D, or CGC1DA

Understanding Canadian Law, Grade 11, College/University

CLU3M

This course explores Canadian law, with a focus on legal issues that are relevant to the lives of people in Canada. Students will gain an understanding of laws relating to rights and freedoms in Canada; our legal system; and family, contract, employment, tort, and criminal law. Students will develop legal reasoning skills and will apply the concepts of legal thinking and the legal studies inquiry process when investigating a range of legal issues and formulating and communicating informed opinions about them.

Prerequisite: CHC2D, CHC2P, CGC1D, or CGC1DA

Computer Studies

Introduction to Computer Science, Grade 11, University

ICS3U

This course introduces students to computer science. Students will design software independently and as part of a team, using industry-standard programming tools and applying the software development lifecycle model. They will also write and use subprograms within computer programs. Students will develop creative solutions for various types of problems as their understanding of the computing environment grows. They will also explore environmental and ergonomic issues, emerging research in computer science, and global career trends in computer-related fields.

Prerequisite: None

Note: The programming language used will be Java and Object-Oriented programming will be introduced.

English

English, Grade 11, College

ENG3C

This course emphasizes the development of literacy, communication, and critical and creative thinking skills necessary for success in academic and daily life. Students will study the content, form, and style of a variety of informational and graphic texts, as well as literary texts from Canada and other countries, and create oral, written, and media texts in a variety of forms for practical and academic purposes. An important focus will be on using language with precision and clarity. The course is intended to prepare students for the compulsory Grade 12 college preparation course.

Prerequisite: ENG2P, ENG2D or ENG2DA

**English, Grade 11, Workplace****ENG3E**

This course emphasizes the development of literacy, communication, and critical and creative thinking skills necessary for success in the workplace and in daily life. Students will study the content, form, and style of a variety of contemporary informational, graphic, and literary texts; and create oral, written, and media texts in a variety of forms for practical purposes. An important focus will be on using language clearly and accurately in a variety of formal and informal contexts. The course is intended to prepare students for the compulsory Grade 12 workplace preparation course.

Prerequisite: ENG2P or ENG2L

English, Grade 11, University**ENG3U**

This course emphasizes the development of literacy, communication, and critical and creative thinking skills necessary for success in academic and daily life. Students will analyse challenging literary texts from various periods, countries, and cultures as well as a range of informational and graphic texts, and create oral, written, and media texts in a variety of forms. An important focus will be on using language with precision and clarity and incorporating stylistic devices appropriately and effectively. The course is intended to prepare students for the compulsory Grade 12 university or college preparation course.

Prerequisite: ENG2D or ENG2DA

English, Grade 11, Pre-AP**ENG3UA**

This course emphasizes the development of literacy, communication, and critical and creative thinking skills necessary for success in academic and daily life. Students will analyse challenging literary texts from various periods, countries, and cultures, as well as a range of informational and graphic texts, and create oral, written, and media texts in a variety of forms. An important focus will be on using language with precision and clarity and incorporating stylistic devices appropriately and effectively. The course is intended to prepare students for the compulsory Grade 12 university preparation course. This course with a focus on British/European literature is chosen by students who wish to prepare for the Advanced Placement senior courses and exams.

Prerequisite: ENG2D or ENG2DA

Please see the Native Studies tab contained in this course calendar.

French as a Second Language

Core French, Grade 11, University**FSF3U**

This course offers students extended opportunities to speak and interact in real-life situations in French with greater independence. Students will develop their listening, speaking, reading, and writing skills, as well as their creative and critical thinking skills, through responding to and exploring a variety of oral and written texts. They will also broaden their understanding and appreciation of diverse French-speaking communities, and will develop skills necessary for lifelong language learning.

Prerequisite: FSF2D

Note: Upon completion of four courses, the student will receive the Core French Program Certificate and be eligible to complete the Diplôme d'Études en Langue Française (DELF) test.

Guidance and Career Education

Advanced Learning Strategies: Skills for Success, After Secondary School, Grade 11, Open**GLE3O**

This course improves students' learning and personal management skills, preparing them to make successful transitions to work, training, and/or postsecondary education destinations. Students will assess their learning abilities and use literacy, numeracy, and research skills and personal management techniques to maximize their learning. Students will investigate trends and resources to support their postsecondary employment, training, and/or education choices and develop a plan to help them meet their learning and career goals.

Prerequisite: Recommendation of principal.

**Leadership and Peer Support, Grade 11, Open****GPP30**

This course prepares students to act in leadership and peer support roles. They will design and implement a plan for contributing to their school and/or community; develop skills in communication, interpersonal relations, teamwork, and conflict management; and apply those skills in leadership and/or peer support roles – for example, as a student council member or a peer tutor. Students will examine group dynamics and learn the value of diversity within groups and communities.

Prerequisite: None

Designing Your Future, Grade 11, Open**GWL30**

This course prepares students to make successful transitions to postsecondary destinations as they investigate specific postsecondary options based on their skills, interests, and personal characteristics. Students will explore the realities and opportunities of the workplace and examine factors that affect success, while refining their job search and employability skills. Students will expand their portfolios with a focus on targeted destination and develop an action plan for future success.

Prerequisite: GLC20

Health and Physical Education

Personal Fitness Activities, Open**PAF30**

This course enables students to further develop the knowledge and skills they need to make healthy choices now and lead healthy, active lives in the future. Through participation in a wide range of physical activities and exposure to a broader range of activity settings, students enhance their movement competence, personal fitness, and confidence. Students also acquire an understanding of the factors and skills that contribute to healthy development and learn how their own well-being is affected by, and affects, the world around them. Students build their sense of self, learn to interact positively with others, and develop their ability to think critically and creatively.

Prerequisite: None

Note: The focus is on student individual needs such as weight control, nutrition counselling, strength training, endurance training, healthy relationships, reproductive health, mental health, and personal safety in an effort to develop discipline, commitment, and the opportunity to improve and maintain their health and fitness goals.

Healthy Active Living Education, Grade 11, Open**PPL30****PPL30M – Male PPL30O – Female**

This course enables students to further develop the knowledge and skills they need to make healthy choices now and lead healthy, active lives in the future. Through participation in a wide range of physical activities and exposure to a broader range of activity settings, students enhance their movement competence, personal fitness, and confidence. Students also acquire an understanding of the factors and skills that contribute to healthy development and learn how their own well-being is affected by, and affects, the world around them. Students build their sense of self, learn to interact positively with others, and develop their ability to think critically and creatively.

Prerequisite: None

Outdoor Education, Grade 11, Open**PAD30**

This course focuses on the development of a healthy lifestyle through instruction and participation in a variety of enjoyable outdoor physical activities that have the potential to engage students' interest throughout their lives. Students will be encouraged to develop personal competence in a variety of outdoor skills and will be given opportunities to practice goal-setting, decision-making, social, and interpersonal skills. Students will also study the components of wilderness first aid and safe practices, psychology of adventure pursuits, and personal wilderness ethics.

Mathematics

Foundations for College Mathematics, Grade 11, College

MBF3C

This course enables students to broaden their understanding of mathematics as a problem solving tool in the real world. Students will extend their understanding of quadratic relations; investigate situations involving exponential growth; solve problems involving compound interest; solve financial problems connected with vehicle ownership; develop their ability to reason by collecting, analyzing, and evaluating data involving one variable; connect probability and statistics; and solve problems in geometry and trigonometry. Students will consolidate their mathematical skills as they solve problems and communicate their thinking.

Prerequisite: MFM2P, MPM2D or MPM2DA

Functions and Applications, Grade 11, College/University

MCF3M

This course introduces basic features of the function by extending students' experiences with quadratic relations. It focuses on quadratic, trigonometric, and exponential functions and their use in modelling real-world situations. Students will represent functions numerically, graphically, and algebraically; simplify expressions; solve equations; and solve problems relating to financial and trigonometric applications. Students will reason mathematically and communicate their thinking as they solve multi-step problems.

Prerequisite: MPM2D, MFM2P or MPM2DA

Functions, Grade 11, University

MCR3U

This course introduces the mathematical concept of the function by extending students' experiences with linear and quadratic relations. Students will investigate properties of discrete and continuous functions, including trigonometric and exponential functions; represent functions numerically, algebraically, and graphically; solve problems involving applications of functions; investigate inverse functions; and develop facility in determining equivalent algebraic expressions. Students will reason mathematically and communicate their thinking as they solve multi-step problems.

Prerequisite: MPM2D or MPM2DA

Functions, Grade 11, Pre-AP

MCR3UA

This course introduces the mathematical concept of the function by extending students' experiences with linear and quadratic relations. Students will investigate properties of discrete and continuous functions, including trigonometric and exponential functions; represent functions numerically, algebraically, and graphically; solve problems involving applications of functions; investigate inverse functions; and develop facility in determining equivalent algebraic expressions. Students will reason mathematically and communicate their thinking as they solve multi-step problems. This course will continue to prepare students to write the Advanced Placement exam in Grade 12.

Prerequisite: MPM2D or MPM2DA

Mathematics for Work and Everyday Life, Grade 11, Workplace

MEL3E

This course enables students to broaden their understanding of mathematics as it is applied in the workplace and daily life. Students will solve problems associated with earning money, paying taxes, and making purchases; apply calculations of simple and compound interest in saving, investing, and borrowing; and calculate the costs of transportation and travel in a variety of situations. Students will consolidate their mathematical skills as they solve problems and communicate their thinking.

Prerequisite: MPM1D, MFM1P, MAT1L, MFM2P or MTH1W

Native Languages and First Nations, Métis and Inuit Studies

Native Languages, Level 3, Open

LNOCO

This course will provide students an opportunity to expand their knowledge of a Native language and of Native philosophy, spirituality, and values, and to enhance their identity and self-worth. Students will communicate by using a variety of phrases and expressions, create short conversations, skits, stories, and narratives, use information technology, and develop an awareness of the structural and functional workings of a Native language.

Prerequisite: Successful completion of LNOBO or demonstrated proficiency.

**English: Understanding Contemporary First Nations, Métis, and Inuit Voices, Grade 11,
College Preparation****NBE3C**

This course explores the themes, forms, and stylistic elements of literary, informational, graphic, oral, cultural, and media text forms emerging from First Nations, Métis, and Inuit cultures in Canada, and also looks at the perspectives and influences of texts that relate to those cultures. In order to understand contemporary text forms and their themes of identity, relationship, and self-determination, sovereignty, or self-governance, students will study the use of text forms by Indigenous authors/creators from other periods in expressing ideas related to these themes. Students will also create oral, written, and media texts to explore their own ideas and understanding, focusing on the development of literacy, communication, and critical and creative thinking skills necessary for success in academic and daily life. The course is intended to prepare students for the compulsory Grade 12 English college preparation course.

Prerequisite: ENG2D, ENG2DA or ENG2P

**English: Understanding Contemporary First Nations, Métis, and Inuit Voices, Grade 11,
Workplace Preparation****NBE3E**

This course explores themes, forms, and stylistic elements of literary, informational, graphic, oral, cultural, and media texts emerging from First Nations, Métis, and Inuit cultures in Canada, as well as some texts that relate to those cultures. In order to better understand contemporary texts, students will explore connections between traditional and contemporary text forms and cultural and community aspects of identity, relationships, and self-determination, sovereignty, or self-governance. Students will also create oral, written, and media texts focusing on the development of literacy, communication, and critical thinking skills necessary for success in the workplace and daily life. The course is intended to prepare students for the compulsory Grade 12 English workplace preparation course.

Prerequisite: ENG2D, ENG2DA or ENG2P

**English: Understanding Contemporary First Nations, Métis, and Inuit Voices, Grade 11,
University Preparation****NBE3U**

This course explores the themes, forms, and stylistic elements of a variety of literary, informational, graphic, oral, cultural, and media text forms emerging from First Nations, Métis, and Inuit cultures in Canada, and also examines the perspectives and influence of texts that relate to those cultures. In order to fully understand contemporary text forms and their themes of identity, relationship, and self-determination, sovereignty, or self-governance, students will analyse the changing use of text forms by Indigenous authors/creators from various periods and cultures in expressing ideas related to these themes. Students will also create oral, written, and media texts to explore their own ideas and understanding, focusing on the development of literacy, communication, and critical and creative thinking skills necessary for success in academic and daily life. The course is intended to prepare students for the compulsory Grade 12 English university or college preparation course.

Prerequisite: ENG2D or ENG2DA

**Worldviews and Aspirations of First Nations, Métis, and Inuit Communities in Canada, Grade 11,
College Preparation****NBV3C**

This course explores the diverse knowledge, world views, and aspirations that shape the actions of First Nations, Métis, and Inuit individuals and communities in Canada. Students will examine the historical and contemporary context of those beliefs, values, aspirations, and actions, including the impact of colonization and decolonization. Students will explore the factors that shape world views to develop an understanding of how acknowledging diverse cultures, values, and ways of knowing contributes to truth, reconciliation, and renewed nation-to-nation relationships. Students are also given the opportunity to develop their own problem-solving strategies to build mutual understanding related to First Nations, Métis, and Inuit world views and aspirations.

Prerequisite: NAC2O, CHC2D, CHC2DA or CHC2P

Worldviews and Aspirations of First Nations, Métis, and Inuit Communities in Canada, Grade 11, Workplace Preparation **NBV3E**

This course explores diverse knowledge, world views, and aspirations that shape the actions of First Nations, Métis, and Inuit individuals and communities in Canada. Students will examine issues of identity facing First Nations, Métis, and Inuit individuals and communities with respect to changing relationships with the land, nature, one another, and Canada. Students will explore their own and others' world views, and the factors that shape world views over time, to develop an understanding of how traditional and contemporary beliefs and values influence the aspirations and practices of First Nations, Métis, and Inuit communities. Students are given the opportunity to develop further understanding about the impacts of colonization and how reconciling diverse knowledge, world views, and aspirations contributes to a call for societal understanding.

Prerequisite: NAC20, CHC2D, CHC2DA or CHC2P

Contemporary First Nations, Métis, and Inuit Issues and Perspectives, Grade 11, University/College **NDA3M**

This course explores existing and emerging issues of local, regional, and national importance to First Nations, Métis, and Inuit in Canada. Students will analyse diverse perspectives on issues and events related to land, community, governance, identity, culture, and global trends. Using the concepts of political thinking and the tools of political inquiry, students will explore their own and others' ideas and investigate issues to determine what needs to change and why. Students are also given the opportunity to develop their own problem-solving strategies to address an issue of their choice.

Prerequisite: NAC20, CHC2D, CHC2DA or CHC2P

Religious Education

Faith and Culture: World Religions, Grade 11, Open **HRF3O**

This course engages students in the examination of world religions, particularly Judaism, Christianity and Islam, First Nations, Métis and Inuit Spiritualities', and locally appropriate religious tradition(s), if suitable. This is a survey course that will help students understand the basic similarities and differences between the religious traditions so they can interact with others with acceptance and familiarity. Ontario is a multi-faith global community. Students will deepen their understanding of the various faith traditions in their local community and around the world.

Prerequisite: None

Faith and Culture: World Religions, Grade 11, University/College **HRT3M**

This course engages students in the examination of world religions, particularly Judaism, Christianity, Islam and the First Nations, Métis and Inuit Spiritualities and a locally appropriate religious tradition. This is a survey course that will help students understand the basic similarities and differences between the religious traditions so they can interact with others with acceptance and familiarity. We live in a multi-faith global community. With the knowledge of this course, students ought to be able to understand more clearly the world's religious affairs.

Prerequisite: None

Science

Biology, Grade 11, College **SBI3C**

This course focuses on the processes that occur in biological systems. Students will learn concepts and theories as they conduct investigations in the areas of cellular biology, microbiology, genetics, the anatomy of mammals, and the structure of plants and their role in the natural environment. Emphasis will be placed on the practical application of concepts, and on the skills needed for further study in various branches of the life sciences and related fields.

Prerequisite: SNC2D or SNC2P

Biology, Grade 11, University **SBI3U**

This course furthers students' understanding of the processes that occur in biological systems. Students will study theory and conduct investigations in the areas of biodiversity; evolution; genetic processes; the structure and function of animals; and the anatomy, growth, and function of plants. The course focuses on the theoretical aspects of the topics under study, and helps students refine skills related to scientific investigation.

Prerequisite: SNC2D or SNC2DA

**Biology, Grade 11, University (Pre-AP)****SBI3UA**

This course furthers students' understanding of the processes that occur in biological systems. Students will study theory and conduct investigations in the areas of biodiversity; evolution; genetic processes; the structure and function of animals; and the anatomy, growth, and function of plants. The course focuses on the theoretical aspects of the topics under study, and helps students refine skills related to scientific investigation. This enriched program is designed to continue preparation for the Advanced Placement exam in Grade 12.

Prerequisite: SNC2D or SNC2DA

Chemistry, Grade 11, University**SCH3U**

This course enables students to deepen their understanding of chemistry through the study of the properties of chemicals and chemical bonds; chemical reactions and quantitative relationships in those reactions; solutions and solubility; and atmospheric chemistry and the behaviour of gases. Students will further develop their analytical skills and investigate the qualitative and quantitative properties of matter, as well as the impact of some common chemical reactions on society and the environment.

Prerequisite: SNC2D or SNC2DA

Physics, Grade 11, University**SPH3U**

This course develops students' understanding of the basic concepts of physics. Students will explore kinematics, with an emphasis on linear motion; different kinds of forces; energy transformations; the properties of mechanical waves and sound; and electricity and magnetism. They will enhance their scientific investigation skills as they test laws of physics. In addition, they will analyse the interrelationships between physics and technology, and consider the impact of technological applications of physics on society and the environment.

Prerequisite: SNC2D or SNC2DA

Social Sciences and Humanities

Working with Infants and Young Children, Grade 11, College**HPW3C**

This course prepares students for occupations involving children from birth to six years of age. Students will study theories about child behaviour and development and will have opportunities for research and observation and for practical experiences with young children. Students will become familiar with occupational opportunities and requirements related to working with infants and young children. They will also have opportunities to develop research and critical-thinking skills as they investigate and evaluate current research about early childhood education.

Prerequisite: None

Understanding Fashion, Grade 11, College**HNC3C**

This course introduces students to the world of fashion. Students will gain an understanding of theories related to fashion trends and of how culture, media, fashion cycles, retailing, and social and environmental factors influence fashion trends and consumer behaviour. Students will use various tools, technologies, and techniques safely and correctly to create fashion items. In addition, students will apply knowledge of fibers, fabrics, and the elements and principles of design when creating and assessing fashion-related products. Students will develop research skills as they investigate topics related to fashion.

Prerequisite: None

Introduction to Anthropology, Psychology, and Sociology, Grade 11, College**HSP3C**

This course introduces students to theories, questions, and issues related to anthropology, psychology, and sociology. Students learn about approaches and research methods used by social scientists. They will be given opportunities to apply theories from a variety of perspectives, to conduct social science research, and to become familiar with current issues within the three disciplines.

Prerequisite: None

Introduction to Anthropology, Psychology, and Sociology, Grade 11, University**HSP3U**

This course provides students with opportunities to think critically about theories, questions, and issues related to anthropology, psychology, and sociology. Students will develop an understanding of the approaches and research methods used by social scientists. They will be given opportunities to explore theories from a variety of perspectives, to conduct social science, and to become familiar with current thinking on a range of issues within the three disciplines.

Prerequisite: ENG2D, CHC2D or CHC2DA

Philosophy: The Big Questions, Grade 11, University/College

HZB3M

This course encourages exploration of philosophy's big questions, such as: What is a meaningful life? What separates right from wrong? What constitutes knowledge? What makes something beautiful? What is a just society? Students will develop critical thinking and philosophical reasoning skills as they identify and analyse the responses of philosophers to the big questions and formulate their own responses to them. Students will explore the relevance of philosophical questions to society and to their everyday life. They will develop research and inquiry skills as they investigate various topics in philosophy.

Prerequisite: None

Technological Education

Construction Engineering Technology, Grade 11, College

TCJ3C

This course focuses on the development of knowledge and skills related to residential construction. Students will gain hands on experience using a variety of construction materials, processes, tools, and equipment; learn about building design and planning construction projects; create and interpret working drawings and sections; and learn how the Ontario Building Code and other regulations and standards apply to construction projects. Students will also develop an awareness of environmental and societal issues related to construction technology and explore career opportunities in the field.

Prerequisite: None

Construction Engineering Technology, Part 1 Specialist High Skills Major, Grade 11, College

TCJ3C1

This course focuses on the development of knowledge and skills related to residential construction. Students will gain hands on experience using a variety of construction materials, processes, tools, and equipment; learn about building design and planning construction projects; create and interpret working drawings and sections; and learn how the Ontario Building Code and other regulations and standards apply to construction projects. Students will also develop an awareness of environmental and societal issues related to construction technology and explore career opportunities in the field.

Corequisites: If you take this course, you must also take TCJ32 - Construction Engineering Technology Part 2.

Prerequisite: None

Note: This is the first construction course which must be taken by students enrolled in the Specialist High Skills Major in Construction.

Construction Engineering Technology, Part 2 Specialist High Skills Major, Grade 11, College

TCJ3C2

This course focuses on the development of knowledge and skills related to residential construction. Students will gain hands on experience using a variety of construction materials, processes, tools, and equipment; learn about building design and planning construction projects; create and interpret working drawings and sections; and learn how the Ontario Building Code and other regulations and standards apply to construction projects. Students will also develop an awareness of environmental and societal issues related to construction technology and explore career opportunities in the field.

Corequisites: If you take this course, you must also take TCJ31 - Construction Engineering Technology Part 1.

Prerequisite: None

Construction Technology, Grade 11, Workplace Preparation

TCJ3E

This course enables students to develop technical knowledge and skills related to carpentry, masonry, electrical systems, heating and cooling, and plumbing for residential construction. Students will gain hands-on experience using a variety of materials, processes, tools, and equipment to design, lay out, and build projects. They will create and read technical drawings, learn construction terminology, interpret building codes and regulations, and apply mathematical skills as they develop construction projects. Students will also develop an awareness of environmental and societal issues related to construction technology, and will explore postsecondary and career opportunities in the field.

Prerequisite: None

Computer Engineering Technology, Grade 11, College/University**TEJ3M**

course examines computer systems and control of external devices. Students will assemble computers and small networks by installing and configuring appropriate hardware and software. Students will develop knowledge and skills in electronics, robotics, programming, and networks, and will build systems that use computer programs and interfaces to control and/or respond to external devices. Students will develop an awareness of environmental and societal issues related to the use of computers and will learn about college and university programs leading to careers in computer engineering.

Prerequisite: None

Hospitality and Tourism, Grade 11, College**TFJ3C1**

This course enables students to develop or expand knowledge and skills related to hospitality and tourism, as reflected in the various sectors of the tourism industry. Students will learn about preparing and presenting food, evaluating facilities, controlling inventory, and marketing and managing events and activities, and will investigate customer service principles and the cultural and economic forces that drive tourism trends. Students will develop an awareness of health and safety standards, environmental and societal issues, and career opportunities in the tourism industry.

Prerequisite: None

Note: Students wishing to earn the Specialist High Skills Major certificate in Hospitality and Foods are required to take this course.

Hospitality and Tourism, Grade 11, College**TFJ3C2**

This course enables students to develop or expand knowledge and skills related to hospitality and tourism, as reflected in the various sectors of the tourism industry. Students will learn about preparing and presenting food, evaluating facilities, controlling inventory, and marketing and managing events and activities, and will investigate customer service principles and the cultural and economic forces that drive tourism trends. Students will develop an awareness of health and safety standards, environmental and societal issues, and career opportunities in the tourism industry.

Prerequisite: None

Note: Students wishing to earn the Specialist High Skills Major certificate in Hospitality and Foods are required to take this course.

Communications Technology: Print and Graphic Communications, Grade 11, College/University**TGG3M**

This course builds on the TGJ3M course. Student activities and responsibilities extend further. In addition to designing the yearbook spreads and preparing for publication, students will develop sales, marketing and promotional strategies/skills. Students will use a hands-on approach and implement these skills to promote the sales of the school yearbook. To expand on their skills, advanced Photoshop lessons will be taught. Copyright and ethics issues using Photoshop will be addressed. Careers in Communications Technology and environmental and social issues of technology will also be addressed.

Prerequisite: None

Note: This course is offered semester 2.

Communications Technology: Print and Graphic Communications, Grade 11, College/University**TGJ3M**

This course examines communications technology from a media perspective. Students will develop knowledge and skills as they design and produce media projects in the areas of live, recorded, and graphic communications. These areas may include TV, video, and movie production; radio and audio production; print and graphic communications; photography; digital imaging; broadcast journalism; and interactive new media. Students will also develop an awareness of related environmental and societal issues and explore college and university programs and career opportunities in the various communications technology fields. **Note:** This course is offered semester 1.

Prerequisite: None

Manufacturing: Welding Technician, Grade 11, College**TMY3C**

This course enables students to develop knowledge and skills through hands-on, project-based learning. Students will acquire design, fabrication, and problem-solving skills and rudiments in welding techniques. They will also have the opportunity to perform product research, create working drawings, and identify and describe different properties of a variety of metals. Students will develop an awareness of environmental and societal issues related to manufacturing and will learn about pathways leading to careers in the industry.

Prerequisite: None

Health Care, Grade 11, College

TPJ3C

This course enables students to develop their understanding of basic health care procedures, including the safe use of appropriate instruments, equipment, and materials. Students will focus on health care fundamentals, including health care terminology and the anatomical features and physiology of some major body systems. Students will develop an awareness of health and safety issues in the health care field, environmental and societal issues related to health care, professional practice standards, and career opportunities in the field.

Prerequisite: SNC2D or SNC2P

Health Care, Grade 11, College/University

TPJ3M

This course enables students to develop their understanding of basic health care procedures, including the safe use of appropriate instruments, equipment, and materials. Students will focus on health care fundamentals, including the anatomical features and physiology of the major body systems and factors that affect homeostasis in the human body. Students will develop an awareness of health and safety issues in the health care field, analyse environmental and societal issues related to health care, and learn about professional practice standards and career opportunities in the field.

Prerequisite: SNC2D or SNC2P

Transportation Technology, Grade 11, College

TTJ3C

This course enables students to develop technical knowledge and skills as they study, test, service, and repair engine, electrical, suspension, brake, and steering systems on vehicles, aircraft, and/or watercraft. Students will develop communication and teamwork skills through practical tasks, using a variety of tools and equipment. Students will develop an awareness of environmental and societal issues related to transportation and will learn about apprenticeship and college programs leading to careers in the transportation industry.

Prerequisite: None

Custom Woodworking, Grade 11, Workplace Preparation

TWJ3E

This course enables students to develop knowledge and skills related to cabinet making and furniture making. Students will gain practical experience using a variety of the materials, tools, equipment, and joinery techniques associated with custom woodworking. Students will learn to create and interpret technical drawings and will plan, design, and fabricate projects. They will also develop an awareness of environmental and societal issues related to the woodworking industry, and will explore apprenticeships, postsecondary training, and career opportunities in the field that may be pursued directly after graduation.

Prerequisite: None

GRADE 12 COURSES

The Arts

Drama, Grade 12, College/University

ADA4M

This course requires students to experiment individually and collaboratively with forms and conventions of both drama and theatre from various cultures and time periods. Students will interpret dramatic literature and other text and media sources while learning about various theories of directing and acting. Students will examine the significance of dramatic arts in various cultures and will analyse how the knowledge and skills developed in drama are related to their personal skills, social awareness, and goals beyond secondary school.

Prerequisite: ADA3M

Instrumental Music – Guitar, Grade 12, College/University

AMG4M

This course enables students to enhance their musical literacy through the creation, appreciation, analysis, and performance of music. Students will perform traditional, commercial, and art music, and will respond with insight to live and recorded performances. Students will enhance their understanding of the function of music in society and the impact of music on themselves and various communities and cultures. Students will analyse how to apply skills developed in music to their life and careers.

Prerequisite: AMG3M

Note: Students will focus their work on the various aspects of musical performance through the study of classical nylon string guitar. Part of the course will focus on the development of techniques for performance on acoustic steel string guitar.

Instrumental Music – Band, Grade 12, College/University

AMI4M

This course enables students to enhance their musical literacy through the creation, appreciation, analysis, and performance of music. Students will perform traditional, commercial, and art music, and will respond with insight to live and recorded performances. Students will enhance their understanding of the function of music in society and the impact of music on themselves and various communities and cultures. Students will analyse how to apply skills developed in music to their life and careers.

Prerequisite: AMI3M

Note: Students will focus their work on the various aspects of musical performance through the study of a woodwind, brass or percussion instrument in a band setting.

Music – Vocal/Choral, Grade 12, College/University

AMV4M

This course enables students to enhance their musical literacy through the creation, appreciation, analysis, and performance of music. Students will perform traditional, commercial, and art music, and will respond with insight to live and recorded performances. Students will enhance their understanding of the function of music in society and the impact of music on themselves and various communities and cultures. Students will analyse how to apply skills developed in music to their life and careers.

Prerequisite: AMV3M

Note: Students will focus their work on the various aspects of musical performance through the study of musical theatre, popular music and classical vocal repertoire.

Visual Arts, Grade 12, College/University

AVI4M

This course focuses on enabling students to refine their use of the creative process when creating and presenting two- and three-dimensional art works using a variety of traditional and emerging media and technologies. Students will use the critical analysis process to deconstruct art works and explore connections between art and society. The studio program enables students to explore a range of materials, processes, and techniques that can be applied in their own art production. Students will also make connections between various works of art in personal, contemporary, historical, and cultural contexts.

Prerequisite: AVI3M

Visual Arts – Information/Consumer Design, Grade 12, College/University**AWE4M**

This course focuses on enabling students to refine their use of the creative process when creating and presenting two- and three-dimensional art works using a variety of traditional and emerging media and technologies. Students will use the critical analysis process to deconstruct art works and explore connections between art and society. The studio program enables students to explore a range of materials, processes, and techniques that can be applied in their own art production. Students will also make connections between various works of art in personal, contemporary, historical, and cultural contexts.

Prerequisite: AWE3M

Note: Webpage – This course will provide students with the opportunity to refine their skills in developing a variety of webpages. Students will develop webpages using html code, Dreamweaver, Flash and JavaScript.

Business Studies**Financial Accounting Principles, Grade 12, College/University****BAT4M**

This course introduces students to advanced accounting principles that will prepare them for postsecondary studies in business. Students will learn about financial statements for various forms of business ownership and how those statements are interpreted in making business decisions. This course further develops accounting methods for assets and introduces accounting for partnerships, corporations, and sources of financing.

Prerequisite: BAF3M

International Business Fundamentals, Grade 12, College/University**BBB4M**

This course provides an overview of the importance of international business and trade in the global economy and explores the factors that influence success in international markets. Students will learn about the techniques and strategies associated with marketing, distribution, and managing international business effectively. This course prepares students for postsecondary programs in business, including international business, marketing, and management.

Prerequisite: None

Business Leadership: Management Fundamentals, Grade 12, College/University**BOH4M**

This course focuses on the development of leadership skills used in managing a successful business. Students will analyse the role of a leader in business, with a focus on decision making, management of group dynamics, workplace stress and conflict, motivation of employees, and planning. Effective business communication skills, ethics, and social responsibility are also emphasized.

Prerequisite: None

Canadian and World Studies**World History since the Fifteenth Century, Grade 12, University****CHY4U**

This course traces major developments and events in world history since approximately 1450. Students will explore social, economic, and political changes, the historical roots of contemporary issues, and the role of conflict and cooperation in global interrelationships. They will extend their ability to apply the concepts of historical thinking and the historical inquiry process, including the interpretation and analysis of evidence, as they investigate key issues and ideas and assess societal progress or decline in world history.

Prerequisite: Any university or university/college preparation course in Canadian and world studies, English, or social sciences and humanities

Canadian and International Law, Grade 12, University**CLN4U**

This course explores a range of contemporary legal issues and how they are addressed in both Canadian and international law. Students will develop an understanding of the principles of Canadian and international law and of issues related to human rights and freedoms, conflict resolution, and criminal, environmental, and workplace law, both in Canada and internationally. Students will apply the concepts of legal thinking and the legal studies inquiry process, and will develop legal reasoning skills, when investigating these and other issues in both Canadian and international contexts.

Prerequisite: Any university or university/college preparation course in Canadian and world studies, English, or social sciences and humanities.

Computer Studies

Computer Science, Grade 12, University

ICS4U

This course enables students to further develop knowledge and skills in computer science. Students will use modular design principles to create complex and fully documented programs, according to industry standards. Student teams will manage a large software development project, from planning through to project review. Students will also analyse algorithms for effectiveness. They will investigate ethical issues in computing and further explore environmental issues, emerging technologies, areas of research in computer science, and careers in the field.

Prerequisite: ICS3U

English

English, Grade 12, College

ENG4C

This course emphasizes the consolidation of literacy, communication, and critical and creative thinking skills necessary for success in academic and daily life. Students will analyse a variety of informational and graphic texts, as well as literary texts from various countries and cultures, and create oral, written, and media texts in a variety of forms for practical and academic purposes. An important focus will be on using language with precision and clarity and developing greater control in writing. The course is intended to prepare students for college or the workplace.

Prerequisite: ENG3C or ENG3U, NBE3C or NBE3U

English, Grade 12, Workplace

ENG4E

This course emphasizes the consolidation of literacy, communication, and critical and creative thinking skills necessary for success in the workplace and in daily life. Students will analyse informational, graphic, and literary texts and create oral, written, and media texts in a variety of forms for workplace-related and practical purposes. An important focus will be on using language accurately and organizing ideas and information coherently. The course is intended to prepare students for the workplace and active citizenship.

Prerequisite: ENG3U, ENG3C or ENG3E, NBE3C or NBE3U

English, Grade 12, University

ENG4U

This course emphasizes the consolidation of the literacy, communication, and critical and creative thinking skills necessary for success in academic and daily life. Students will analyse a range of challenging literary texts from various periods, countries, and cultures; interpret and evaluate informational and graphic texts; and create oral, written, and media texts in a variety of forms. An important focus will be on using academic language coherently and confidently, selecting the reading strategies best suited to particular texts and particular purposes for reading, and developing greater control in writing. The course is intended to prepare students for university, college, or the workplace.

Prerequisite: ENG3U, ENG3UA, or NBE3U

English, Grade 12, University (Advanced Placement)

ENG4UA

This course emphasizes the consolidation of the literacy, communication, and critical and creative thinking skills necessary for success in academic and daily life. Students will analyse a range of challenging literary texts from various periods, countries, and cultures; interpret and evaluate informational and graphic texts; and create oral, written, and media texts in a variety of forms. An important focus will be on using academic language coherently and confidently, selecting the reading strategies best suited to particular texts and particular purposes for reading, and developing greater control in writing. The literature for this course will include selections from works across the sixteenth through the twenty-first centuries. The course will prepare students to write the Advanced Placement exam.

Prerequisite: ENG3U, ENG3UA or NBE3U

Optional English Courses

The Writer's Craft, Grade 12, University

EWC4Ue

This course emphasizes knowledge and skills related to the craft of writing. Students will analyse models of effective writing; use a workshop approach to produce a range of works; identify and use techniques required for specialized forms of writing; and identify effective ways to improve the quality of their writing. They will also complete a major paper as part of a creative or analytical independent study project and investigate opportunities for publication and for writing careers. Note: This course will be offered through eLearning.

Prerequisite: ENG3U, ENG3UA, or NBE3U

Ontario Secondary School, Literacy Course, Grade 12, Open

OLC4O

This course is designed to help students acquire and demonstrate the cross-curricular literacy skills that are evaluated by the Ontario Secondary School Literacy Test (OSSLT). Students who complete the course successfully will meet the provincial literacy requirement for graduation. Students will read a variety of informational, narrative, and graphic texts and will produce a variety of forms of writing, including summaries, information paragraphs, opinion pieces, and news reports. Students will also maintain and manage a portfolio containing a record of their reading experiences and samples of their writing.

Eligibility Requirement: Students who have been eligible to write the OSSLT and who have been unsuccessful are eligible to take the course. Students who have already met the literacy requirement for graduation may be eligible to take the course under special circumstances, at the discretion of the principal.

French as a Second Language

Core French, Grade 12, University

FSF4U

This course provides extensive opportunities for students to speak and interact in French independently. Students will develop their listening, speaking, reading, and writing skills, apply language learning strategies in a wide variety of real-life situations, and develop their creative and critical thinking skills through responding to and interacting with a variety of oral and written texts. They will also enrich their understanding and appreciation of diverse French-speaking communities, and will develop skills necessary for lifelong language learning.

Prerequisite: FSF3U

Note: Upon completion of four courses, the student will receive the Core French Program Certificate and be eligible to complete the Diplôme d'Études en Langue Française (DELF) test.

Guidance and Career Education

Advanced Learning Strategies: Skills for Success, After Secondary School, Grade 12, Open

GLE4O

This course improves students' learning and personal management skills, preparing them to make successful transitions to work, training, and/or postsecondary education destinations. Students will assess their learning abilities and use literacy, numeracy, and research skills and personal management techniques to maximize their learning. Students will investigate trends and resources to support their postsecondary employment, training, and/or education choices and develop a plan to help them meet their learning and career goals.

Prerequisite: Recommendation of principal

Navigating the Workplace, Grade 12, Open

GLN4O

This course provides students with opportunities to develop the workplace essential skills and work habits required for success in all types of workplaces. Students will explore occupations and careers of interest through participation in real workplace experiences. They will make plans for continued learning and work, work with others to design learning experiences, and investigate the resources and support required to make a smooth transition to their postsecondary destination.

Prerequisite: None

Health and Physical Education

Personal Fitness Activities, Open

PAF40

This course enables students to further develop the knowledge and skills they need to make healthy choices. It places special emphasis on how students can maintain the habits of healthy, active living throughout their lives as they make the transition to adulthood and independent living. Through participation in a wide range of physical activities in a variety of settings, students can enhance their movement competence, personal fitness, and confidence. Students also acquire an understanding of the factors and skills that contribute to healthy development and learn how their own well-being is affected by, and affects, the world around them. Students build their sense of self, learn to interact positively with others, and develop their ability to think critically and creatively.

Prerequisite: None

Note: The emphasis is on highly challenging physical activities that promote lifelong, healthy, active living and personal physical fitness through fitness training methods and principles, varied methods of improving and maintaining personal fitness, physical competence, safety and injury prevention.

Recreation and Healthy Active Living, Grade 12, College

PLF4M

This course enables students to explore the benefits of lifelong participation in active recreation and healthy leisure and to develop the leadership and coordinating skills needed to plan, organize, and safely implement recreational events and other activities related to healthy, active living. Students will also learn how to promote the benefits of healthy, active living to others through mentoring and assisting them in making informed decisions that enhance their well-being. The course will prepare students for university programs in physical education and health and kinesiology and for college and university programs in recreation and leisure management, fitness and health promotion, and fitness leadership.

Prerequisite: Any health and physical education course.

Healthy Active Living Education, Grade 12, Open

PPL4O**PPL4OM – Male PPL4O0 - Female**

This course enables students to further develop the knowledge and skills they need to make healthy choices. It places special emphasis on how students can maintain the habits of healthy, active living throughout their lives as they make the transition to adulthood and independent living. Through participation in a wide range of physical activities in a variety of settings, students can enhance their movement competence, personal fitness, and confidence. Students also acquire an understanding of the factors and skills that contribute to healthy development and learn how their own well-being is affected by, and affects, the world around them. Students build their sense of self, learn to interact positively with others, and develop their ability to think critically and creatively.

Prerequisite: None

Introductory Kinesiology, Grade 12, University

PSK4U

This course focuses on the study of human movement and of systems, factors, and principles involved in human development. Students will learn about the effects of physical activity on health and performance, the evolution of physical activity and sport, and the physiological, psychological, and social factors that influence an individual's participation in physical activity and sport. The course prepares students for university programs in physical education and health, kinesiology, health sciences, health studies, recreation, and sports administration.

Prerequisite: Any Grade 11 university or university/college preparation course in science, or any Grade 11 or 12 course in health and physical education.

Outdoor Education, Grade 12, Open

PAD4O

This course focuses on the development of a healthy lifestyle through instruction and participation in a variety of enjoyable outdoor physical activities that have the potential to engage students' interest throughout their lives. Students will be encouraged to develop personal competence in a variety of outdoor skills and will be given opportunities to practice goal-setting, decision-making, social, and interpersonal skills. Students will also study the components of wilderness first aid and safe practices, psychology of adventure pursuits, and personal wilderness ethics. This course builds on previous Outdoor education experiences, incorporating higher skill and knowledge development and providing opportunities for leadership development wherever possible.

Prerequisite: None

Interdisciplinary Studies

Peer Tutoring: Leading, Learning and Relating in Educational, Social and Business Contexts, Grade 12 Interdisciplinary Studies, University

IDC4UP

This course combines the expectations from Interdisciplinary Studies with three courses: Business Leadership and Management Fundamentals, BOH4M; Families in Canada, HHS4U; and Leadership and Peer Support, GPP30. Students will develop and consolidate the skills to solve problems and make decisions. Students will apply the processes of inquiry to use a range of resources and to investigate real-life situations and career opportunities.

Prerequisite: Any university or university/college preparation course.

Note: You are only eligible to take one Grade 12 IDC4U course (and a maximum of 3 IDC courses overall) for your transcript.

Note: This course trains senior students with the skills, knowledge and attitudes to relate effectively to others as peer tutors in the school. Tutors will develop communication and interpersonal relationship skills, learn teaching strategies and conflict resolution techniques that will assist them in their tutoring and personal life. Tutors will explore careers that involve teaching and interacting with other people. Tutors choose a subject area of strength and tutor students in one classroom four days each week. One day each week, tutors will meet to complete course work online and progress in their tutoring strategies.

Mathematics

Calculus, Grade 12, University (Interdisciplinary) (Advanced Placement)

IDC4UA

This course is intended for students planning to write the Advanced Placement Calculus AP exam. Calculus is an essential tool for advanced study in many disciplines. This interdisciplinary approach to calculus includes applications in physics and economics to illustrate the importance of calculus to the physical and social sciences. Topics covered by students include: limits and continuity; differential calculus of functions of a single variable including techniques of differentiation; the Mean Value Theorem and determination of extremes, applications of differential calculus with particular emphasis on physics and economics; differential equations and slope fields; integral calculus of functions of a single variable including the Fundamental Theorem of Calculus and techniques of integration; applications of integral calculus.

Prerequisite: MCV4UA

Note: You are only eligible to take one Grade 12 IDC4U course (and a maximum of 3 IDC courses overall) for your transcript.

Foundations for College Mathematics, Grade 12, College

MAP4C

This course enables students to broaden their understanding of real-world applications of mathematics. Students will analyse data using statistical methods; solve problems involving applications of geometry and trigonometry; solve financial problems connected with annuities, budgets, and renting or owning accommodation; simplify expressions; and solve equations. Students will reason mathematically and communicate their thinking as they solve multi-step problems. This course prepares students for college programs in areas such as business, health sciences, and human services, and for certain skilled trades.

Prerequisite: MCR3U, MCR3UA, MBF3C, or MCF3M

Mathematics for College Technology, Grade 12, College

MCT4C

This course enables students to extend their knowledge of functions. Students will investigate and apply properties of polynomial, exponential, and trigonometric functions; continue to represent functions numerically, graphically, and algebraically; develop facility in simplifying expressions and solving equations; and solve problems that address applications of algebra, trigonometry, vectors, and geometry. Students will reason mathematically and communicate their thinking as they solve multi-step problems. This course prepares students for a variety of college technology programs.

Prerequisite: MCR3U, MCR3UA or MCF3M

**Calculus and Vectors, Grade 12, University****MCV4U**

This course builds on students' previous experience with functions and their developing understanding of rates of change. Students will solve problems involving geometric and algebraic representations of vectors, and representations of lines and planes in three-dimensional space; broaden their understanding of rates of change to include the derivatives of polynomial, rational, exponential, and sinusoidal functions; and apply these concepts and skills to the modelling of real-world relationships. Students will also refine their use of the mathematical processes necessary for success in senior mathematics. This course is intended for students who plan to study mathematics in university and who may choose to pursue careers in fields such as physics and engineering.

Prerequisite: MHF4U or MHF4UA

Note: It is strongly recommended that students complete MHF4U before taking MCV4U.

Calculus and Vectors, Grade 12, University (Advanced Placement)**MCV4UA**

This course builds on students' previous experience with functions and their developing understanding of rates of change. Students will solve problems involving geometric and algebraic representations of vectors, and representations of lines and planes in three-dimensional space; broaden their understanding of rates of change to include the derivatives of polynomial, rational, exponential, and sinusoidal functions; and apply these concepts and skills to the modelling of real-world relationships. Students will also refine their use of the mathematical processes necessary for success in senior mathematics. This course is intended for students who plan to study mathematics in university and who may choose to pursue careers in fields such as physics and engineering. This course will prepare students to write the Advanced Placement exam.

Prerequisite: MHF4U or MHF4UA

Note: It is strongly recommended that students complete MHF4U before taking MCV4UA.

Mathematics of Data Management, Grade 12, University**MDM4U**

This course broadens students' understanding of mathematics as it relates to managing data. Students will apply methods for organizing large amounts of information; solve problems involving probability and statistics; and carry out a culminating project that integrates statistical concepts and skills. Students will also refine their use of the mathematical processes necessary for success in senior mathematics. Students planning to enter university programs in business, the social sciences, and the humanities will find this course of particular interest.

Prerequisite: MCR3U, MCR3UA or MCF3M

Mathematics for Work and Everyday Life, Grade 12, Workplace**MEL4E**

This course enables students to broaden their understanding of mathematics as it is applied in the workplace and daily life. Students will investigate questions involving the use of statistics; apply the concept of probability to solve problems involving familiar situations; investigate accommodation costs and create household budgets; use proportional reasoning; estimate and measure; and apply geometric concepts to create designs. Students will consolidate their mathematical skills as they solve problems and communicate their thinking.

Prerequisite: MEL3E

Advanced Functions, Grade 12, University**MHF4U**

This course extends students' experience with functions. Students will investigate the properties of polynomial, rational, logarithmic, and trigonometric functions; broaden their understanding of rates of change; and develop facility in applying these concepts and skills. Students will also refine their use of the mathematical processes necessary for success in senior mathematics. This course is intended both for students who plan to study mathematics in university and for those wishing to consolidate their understanding of mathematics before proceeding to any one of a variety of university programs.

Prerequisite: MCR3U, MCR3UA or MCT4C

Advanced Functions, Grade 12, University (Pre-AP)**MHF4UA**

This course extends students' experience with functions. Students will investigate the properties of polynomial, rational, logarithmic, and trigonometric functions; develop techniques for combining functions; broaden their understanding of rates of change; and develop facility in applying these concepts and skills. Students will also refine their use of the mathematical processes necessary for success in senior mathematics. This course is intended both for students taking the Calculus and Vectors course as a prerequisite for a university program and for those wishing to consolidate their understanding of mathematics before proceeding to any one of a variety of university programs. This course will prepare students to write the Advanced Placement exam.

Prerequisite: MCR3U or MCR3UA

Native Languages and First Nations, Métis and Inuit Studies

Native Languages, Level 4, Open

LNODO

This course will provide students with opportunities to further develop their knowledge of a Native language and of Native philosophy, spirituality, and values, and to enhance their sense of identity and self-worth. Students will increase their vocabulary and their facility in using idioms, and will use the Native language to analyse literature, discuss various issues that affect the local community, and exchange information electronically.

Prerequisite: Successful completion of LNOCO or demonstrated proficiency.

First Nations, Métis, and Inuit Governance in Canada, Grade 12, University/College Preparation

NDG4M

This course investigates how Aboriginal governments exercise authority and demonstrate responsibilities associated with governance in Canada. Students will explore Aboriginal world views regarding identity, relationships among Aboriginal peoples and between Aboriginal peoples and other Canadians, and Aboriginal definitions of sovereignty. Students will also compare traditional and contemporary forms of Aboriginal governance and will examine Aboriginal and Canadian relations, focusing on empowerment and the inherent right to self-government.

Prerequisite: Any Grade 11 university, university/college, or college preparation course in Native studies

Contemporary Indigenous Issues and Perspectives in a Global Context, Grade 12, University/College Preparation

NDW4M

This course provides students with an overview of the issues and challenges that confront indigenous peoples worldwide. Students will develop an understanding of the concerns and aspirations of the world's indigenous population, plan and conduct research on global issues that have an impact on indigenous peoples, and use information technology to consult materials related to the views of indigenous peoples throughout the world.

Prerequisite: Any Grade 11 university, university/college, or college preparation course in Native studies

Religious Education

Religious Education “Church and Culture”, Grade 12, University/College

HRE4M

This course enables students to deepen their understanding of how the Church engages contemporary culture with faith and reason, in pursuit of love, justice, and the common good. Students will have opportunity to learn how living the Baptismal vocation to a virtuous life, filled with the joy of the Gospel and nurtured by the sacraments, can transform them and society from within, allowing God to reign in human hearts. Students will also refine research and inquiry skills.

Prerequisite: HRT3M or any university or university/college preparation course in social sciences and humanities, English, or Canadian and world studies

Religious Education: “Church and Culture”, Grade 12, Open

HRE4O

This course has the aim of assisting students in understanding themselves as moral persons living the way of Christ through an examination of the revelation of sacred Scripture, and the experience and teaching of the Catholic Church. It engages students in critical reflection on significant contemporary moral and ethical issues in light of Scripture, Church teaching, and their own experiences (i.e., Theological Reflection). Social and ecological justice issues are explored along with a study of topics that focus on Christian mercy and forgiveness. The graces and challenges of every day human living, understanding who we are, what we are called to be, and living in relationships, including marriage, and family life are explored from a Catholic perspective. Students are challenged to adopt the Christian stance in the political world.

Prerequisite: None

Science

Biology, Grade 12, University

SBI4U

This course provides students with the opportunity for in-depth study of the concepts and processes that occur in biological systems. Students will study theory and conduct investigations in the areas of biochemistry, metabolic processes, molecular genetics, homeostasis, and population dynamics. Emphasis will be placed on the achievement of detailed knowledge and the refinement of skills needed for further study in various branches of the life sciences and related fields.

Prerequisite: SBI3U or SBI3UA

**Biology, Grade 12, University (Advanced Placement)****SBI4UA**

This course provides students with the opportunity for in-depth study of the concepts and processes that occur in biological systems. Students will study theory and conduct investigations in the areas of biochemistry, metabolic processes, molecular genetics, homeostasis, and population dynamics. Emphasis will be placed on the achievement of detailed knowledge and the refinement of skills needed for further study in various branches of the life sciences and related fields. This course will prepare students to write the Advanced Placement exam.

Prerequisite: SBI3UA or SBI3U

Chemistry, Grade 12, College**SCH4C**

This course enables students to develop an understanding of chemistry through the study of matter and qualitative analysis, organic chemistry, electrochemistry, chemical calculations, and chemistry as it relates to the quality of the environment. Students will use a variety of laboratory techniques, develop skills in data collection and scientific analysis, and communicate scientific information using appropriate terminology. Emphasis will be placed on the role of chemistry in daily life and the effects of technological applications and processes on society and the environment.

Prerequisite: SNC2D, SNC2DA or SNC2P

Chemistry, Grade 12, University**SCH4U**

This course enables students to deepen their understanding of chemistry through the study of organic chemistry, the structure and properties of matter, energy changes and rates of reaction, equilibrium in chemical systems, and electrochemistry. Students will further develop their problem-solving and investigation skills as they investigate chemical processes, and will refine their ability to communicate scientific information. Emphasis will be placed on the importance of chemistry in everyday life and on evaluating the impact of chemical technology on the environment.

Prerequisite: SCH3U or SCH3UA

Physics, Grade 12, College**SPH4C**

This course develops students' understanding of the basic concepts of physics. Students will explore these concepts with respect to motion; mechanical, electrical, electromagnetic, energy transformation, hydraulic, and pneumatic systems; and the operation of commonly used tools and machines. They will develop their scientific investigation skills as they test laws of physics and solve both assigned problems and those emerging from their investigations. Students will also consider the impact of technological applications of physics on society and the environment.

Prerequisite: SNC2D, SNC2DA or SNC2P

Physics, Grade 12, University**SPH4U**

This course enables students to deepen their understanding of physics concepts and theories. Students will continue their exploration of energy transformations and the forces that affect motion, and will investigate electrical, gravitational, and magnetic fields and electromagnetic radiation. Students will also explore the wave nature of light, quantum mechanics, and special relativity. They will further develop their scientific investigation skills, learning, for example, how to analyse, qualitatively and quantitatively, data related to a variety of physics concepts and principles. Students will also consider the impact of technological applications of physics on society and the environment.

Prerequisite: SPH3U

Social Sciences and Humanities

Nutrition and Health, Grade 12, University**HFA4U**

This course examines the relationships between food, energy balance, and nutritional status; the nutritional needs of individuals at different stages of life; and the role of nutrition in health and disease. Students will evaluate nutrition-related trends and will determine how food choices can promote food security and environmental responsibility. Students will learn about healthy eating, expand their repertoire of food-preparation techniques, and develop their social science research skills by investigating issues related to nutrition and health.

Prerequisite: Any university or university/college preparation course in social sciences and humanities, English, or Canadian and world studies

Families in Canada, Grade 12, University**HHS4U**

This course enables students to draw on sociological, psychological, and anthropological theories and research to analyse the development of individuals, intimate relationships, and family and parent-child relationships. Students will focus on issues and challenges facing individuals and families in Canada's diverse society. They will develop analytical tools that enable them to assess various factors affecting families and to consider policies and practices intended to support families in Canada. They will develop the investigative skills required to conduct and communicate the results of research on individuals, intimate relationships, and parent-child relationships.

Prerequisite: Any university or college/university preparation course in social sciences and humanities, English, or Canadian and world studies.

Challenge and Change in Society, Grade 12, University**HSB4U**

This course focuses on the use of social science theories, perspectives, and methodologies to investigate and explain shifts in knowledge, attitudes, beliefs, and behaviour and their impact on society. Students will critically analyse how and why cultural, social, and behavioural patterns change over time. They will explore the ideas of social theorists and use those ideas to analyse causes of and responses to challenges such as technological change, deviance, and global inequalities. Students will explore ways in which social science research methods can be used to study social change.

Prerequisite: Any university or college/university preparation course in social sciences and humanities, English, or Canadian and world studies.

Philosophy: Questions and Theories, Grade 12, University**HZT4U**

This course enables students to acquire an understanding of the nature of philosophy and philosophical reasoning skills and to develop and apply their knowledge and skills while exploring specialized branches of philosophy (the course will cover at least three of the following branches: metaphysics, ethics, epistemology, philosophy of science, social and political philosophy, and aesthetics). Students will develop critical thinking and philosophical reasoning skills as they formulate and evaluate arguments related to a variety of philosophical questions and theories. They will also develop research and inquiry skills related to the study and practice of philosophy.

Prerequisite: Any university or university/college preparation course in social sciences and humanities, English, or Canadian and world studies

Note: This course can be used to satisfy the Grade 12 Religion requirement.

Technological Education

Construction Engineering Technology, Grade 12, College**TCJ4C**

This course enables students to further develop knowledge and skills related to residential construction and to explore light commercial construction. Students will gain hands on experience using a variety of materials, processes, tools, and equipment and will learn more about building design and project planning. They will continue to create and interpret construction drawings and will extend their knowledge of construction terminology and of relevant building codes and regulations, as well as health and safety standards and practices. Students will also focus on environmental and societal issues related to construction engineering technology and explore career opportunities in the field.

Prerequisite: TCJ3C

Construction Engineering Technology, Grade 12, College**TCJ4C1****Part 1 Specialist High Skills Major, Grade 12, College**

This course enables students to further develop knowledge and skills related to residential construction and to explore light commercial construction. Students will gain hands on experience using a variety of materials, processes, tools, and equipment and will learn more about building design and project planning. They will continue to create and interpret construction drawings and will extend their knowledge of construction terminology and of relevant building codes and regulations, as well as health and safety standards and practices. Students will also focus on environmental and societal issues related to construction engineering technology and explore career opportunities in the field.

Prerequisite: TCJ3C1 and TCJ3C2

Note: This is the first grade 12 construction course which must be taken by students enrolled in the Specialist High Skills Major in Construction.

**Construction Engineering Technology, Grade 12, College
Part 2 Specialist High Skills Major, Grade 12, College****TCJ4C2**

This course enables students to further develop knowledge and skills related to residential construction and to explore light commercial construction. Students will gain hands on experience using a variety of materials, processes, tools, and equipment and will learn more about building design and project planning. They will continue to create and interpret construction drawings and will extend their knowledge of construction terminology and of relevant building codes and regulations, as well as health and safety standards and practices. Students will also focus on environmental and societal issues related to construction engineering technology and explore career opportunities in the field.

Prerequisite: TCJ4C1

Computer Engineering Technology, Grade 12, College/University**TEJ4M**

This course extends students' understanding of computer systems and computer interfacing with external devices. Students will assemble computer systems by installing and configuring appropriate hardware and software, and will learn more about fundamental concepts of electronics, robotics, programming, and networks. Students will examine environmental and societal issues related to the use of computers, and explore postsecondary pathways leading to careers in computer engineering and related fields.

Prerequisite: TEJ3M0

Hospitality and Tourism, Grade 12, College**TFJ4C1**

This course enables students to further develop knowledge and skills related to the various sectors of the tourism industry. Students will demonstrate advanced food preparation and presentation skills; increase health and wellness knowledge; develop tourism administration and management skills; design and implement a variety of events or activities; and investigate principles and procedures that contribute to high-quality customer service. Students will expand their awareness of health and safety issues, environmental and societal issues, and career opportunities in the tourism industry.

Prerequisite: TFJ3C1 or TFJ3C2

Note: This course is required for students who wish to earn the Specialist High Skills Major certificate in Hospitality and Tourism. It is also available to non- High Skills Major students without TFJ3C.

Hospitality and Tourism, Grade 12, College**TFJ4C2**

This course enables students to further develop knowledge and skills related to the various sectors of the tourism industry. Students will demonstrate advanced food preparation and presentation skills; increase health and wellness knowledge; develop tourism administration and management skills; design and implement a variety of events or activities; and investigate principles and procedures that contribute to high-quality customer service. Students will expand their awareness of health and safety issues, environmental and societal issues, and career opportunities in the tourism industry.

Prerequisite: TFJ3C1 or TFJ3C2

Communications Technology: Print and Graphic Communications, Grade 12, College/University**TGG4M**

The TGG4M course builds on the other TGG3 and TGJ courses. Beyond fulfilling all the responsibilities in the completion and production of the yearbook, students will develop a portfolio demonstrating their application of skills in print and graphic communications. Extensive experience in Photoshop, Illustrator, InDesign and iMovie will be acquired. Students may also be assigned roles and responsibilities that will oversee the success and publication of the yearbook – Editor, Copy Editor, Lead Photographer, Art Director, etc. This course will prepare students for post-secondary education in Communications Technology.

Prerequisite: TGJ3M or TGG3M

Note: This course is offered semester 2.

Communications Technology: Print and Graphic Communications, Grade 12, College/University**TGJ4M**

This course enables students to further develop media knowledge and skills while designing and producing projects in the areas of live, recorded, and graphic communications. Students may work in the areas of TV, video, and movie production; radio and audio production; print and graphic communications; photography; digital imaging; broadcast journalism; and interactive new media. Students will also expand their awareness of related environmental and societal issues related to communications technology and will investigate career opportunities and challenges in a rapidly changing technological environment.

Prerequisite: TGJ3M or TGG3M

Note: This course is offered semester 1.

Manufacturing: Welding Technician, Grade 12, College

TMY4C

In this course, students will learn about the welding process, metallurgy, metal fabrication, and steelmaking, and develop skills through hands-on, project-based tasks that are derived from CWB (Canadian Welding bureau) standards. Students will acquire and develop design, fabrication, and problem-solving skills while using equipment such as welders, mills, and various power tools. Students will also study environmental and societal issues related to manufacturing, as well as learn to identify pathways to careers related to the industry.

Prerequisite: TMY3C

Transportation Technology, Grade 12, College

TTJ4C

This course enables students to further develop technical knowledge and skills as they study, test, service, and repair engine management systems; power trains; steering/control, suspension, brake, and body systems on vehicles, aircraft, and/or watercraft; and/or small-engine products. Students will refine communication and teamwork skills through practical tasks, using a variety of tools and equipment. Students will expand their awareness of environmental and societal issues related to transportation and their knowledge of apprenticeship and college programs leading to careers in the transportation industry.

Prerequisite: TTJ3C
